INDEX OF AUTHORS' NAMES.

TRANSACTIONS. 1900.

(Marked T.); and also to Proceedings of the Session 1899—1900, Nos. 213 to 226, Nov., 1899—June, 1900 (marked P.).

COMPILED BY MARGARET D. DOUGAL.

A.

Adie, *Richard Haliburton*, sulphates of bismuth, P., **1899**, 226.

Adie, *Richard Haliburton*, and *Kendall Colin* **Browning**, interaction of sulphuric acid and potassium ferrocyanide, T., 150; P., **1899**, 226.

Adie, *Richard Haliburton*, and *Thomas Barlow* **Wood**, a new method of estimating potassium, T., 1076; P., **1900**, 17.

Allen, *Richard William*, the maximum pressure of naphthalene vapour, T., 400; P., **1899**, 122.

—— the maximum pressure of camphor vapour, T., 413; P., **1899**, 135.

Armstrong, *Henry Edward*, phenylacetylchloramine and its analogues, T., 1047; P., **1900**, 160.

—— azo- and hydrazone compounds differentiated by bromine, P., **1899**, 243.

—— note on Bach's hydrogen tetroxide, P., **1900**, 134.

Armstrong, *Henry Edward*, and *W.* **Berry**, meta-sulphonation of aniline, P., **1900**, 159.

Armstrong, *Henry Edward*, and *Percy C. C.* **Isherwood**, bromination of oxyazo-compounds, P., **1900**, 158.

Armstrong, *Henry Edward*, and *Edward W.* **Lewis**, inhibiting effect of etherification on substitution in phenols, P., **1900**, 157.

Armstrong, *Henry Edward*, and *Sidney Scrivener* **Napper**, benzene-*o*-disulphonic acid, P., **1900**, 160.

Aston, *William George*. See *John Theodore* **Hewitt**.

Auden, *Harold Allden*, some new osazones and tetrazones, P., **1899**, 229.

B.

Baker, *H. Brereton*, vapour density of dried mercurous chloride, T., 646; P., **1900**, 68; discussion, P., 68.

Baker, *Julian Levett*, and *Thomas Henry* **Pope**, mannogalactan and lævulomannan; two new polysaccharides, T., 696; P., **1900**, 72.

Baker, *T. J.*, heat of combination of copper with zinc, P., **1899**, 195.

Beddow, *Frederick*. See *Siegfried* **Ruhemann**.

Berry, *W.* See *Henry Edward* **Armstrong**.

Blackman, *Walter Lionel*. See *Kennedy Joseph Previte* **Orton**.

Bloxam, *William Popplewell*, hydrosulphides, sulphides, and polysulphides of potassium and sodium, T., 753; P., **1899**, 146.

Bone, *William Arthur*, and *Charles H. G.* **Sprankling**, researches on the alkyl-substituted succinic acids. II. *s*-Dipropyl-, *s*-diisopropyl-, and $\alpha\alpha_1$-propylisopropyl-succinic acids, T., 654; P., **1900**, 71.

—— —— researches on the alkyl-substituted succinic acids. Part III. Dissociation constants, T., 1298; P., **1900**, 184.

Bottomley, *J. Frank*, and *William Henry* **Perkin**, *jun.*, condensation of formaldehyde with ethyl malonate, and synthesis of pentamethylene-1:2:4-tricarboxylic acid, T., 294; P. **1900**, 16.

Bowtell, *N. E.*, and *William Henry* **Perkin, *jun.***, action of alcoholic potash on ethyl bromoglutarate, P., **1899**, 241.

Browning, *Kendall Colin*, hydroferrocyanic acid, T., 1233; P., **1900**, 172.

Browning, *Kendall Colin*. See also *Richard Haliburton* **Adie**.

Bunsen, *Robert Wilhelm*, memorial lecture on (Roscoe), T., 513; P., **1900**, 84.

C.

Carter, *W.*, and *William Trevor* **Lawrence**, the hydroxyphenoxy- and phenylenedioxy-acetic acids, T., 1222; P., **1900**, 152.

Caven, *Robert Martin*, reaction of magnesium, zinc, and iron with solutions of cupric sulphate, P., **1899**, 232.

Chapman, *Edgar Marsh*. See *Arthur* **Lapworth**.

Chattaway, *Frederick Daniel*, and *Kennedy Joseph Previte* **Orton**, substituted nitrogen chlorides and their relation to the substitution of halogen in anilides and anilines. II. Trichlorophenyl acyl nitrogen chlorides, T., 134; P., **1899**, 232.

—— —— substituted nitrogen chlorides and bromides derived from *o*- and *p*-acetotoluidide, T., 789; P., **1900**, 102.

—— —— ortho-substituted nitrogen chlorides and bromides and the entrance of halogen into the ortho-position in the transformation of nitrogen chlorides, T., 797; P., **1900**, 112; discussion, P., 112.

Chattaway, *Frederick Daniel*, *Kennedy Joseph Previte* **Orton**, and *W. H.* **Hurtley**, nitrogen chlorides derivable from *m*-chloroacteanilide and their transformation, T., 800; P., **1900**, 125.

Collie, *John Norman*, dehydracetic acid, T., 971; P., **1900**, 147.

Collie, *John Norman*, and *Bertram D.* **Steele**, dimethyldiacetylacetone, tetramethylpyrone, and orcinol derivatives from diacetylacetone, T., 961; P., **1900**, 146.

—— —— periodides of substituted oxonium derivatives, T., 1114; P., **1900**, 164.

Cormack, *William*, estimation of furfuraldehyde, T., 990; P., **1900**, 156.

Cormack, *William*. See also *James* **Walker**.

Crafts, *James Mason*, Friedel Memorial Lecture, T., 993.

Crofts, *James Murray*. See *Robert Selby* **Morrell**.

Crossley, *Arthur William*, interaction of mesityl oxide and ethyl sodiomethylmalonate, P., **1900**, 90.

Crossley, *Arthur William*, and *Henry Rondel* **Le Sueur**, determination of the constitution of fatty acids. Part II., T., 83; P., **1899**, 225.

D.

Davis, *William Alfred*, etherification of derivatives of β-naphthol, T., 33; P., **1899**, 210.

Dawson, *Harry Medforth*, and *John* **McCrae**, the nature of metal-ammonia compounds in aqueous solution. Part I., T., 1239; P., **1900**, 172.

Dawson, *Harry Medforth*, and *P.* **Williams**, determination of transition temperatures, P., **1899**, 210.

Dean, *George*, atomic weight of nitrogen, T., 117; P., **1899**, 213.

Divers, *Edward*, the colour of alkali nitrites, P., **1900**, 40.

—— solubility of mixed potassium nitrite and nitrate, P., **1900**, 40; discussion, P., 40.

—— products of the action of sulphur dioxide on ammonia, P., **1900**, 104; discussion, P., 105.

Divers, *Edward*, and *Tamemasa* **Haga**, potassium nitritohydroximidosulphates, and the non-existence of dihydroxylamine derivatives, T., 432; P., **1900**, 54.

—— —— identification and constitution of Fremy's sulphazotised salts of potassium, T., 440; P., **1900**, 55.

—— —— the interaction between sulphites and nitrites, T., 673; P., **1900**, 70.

—— —— decomposition of hydroxyamidosulphates by copper sulphate, T., 978; P., **1900**, 147.

Divers, *Edward*, and *Masataka* **Ogawa**, ammonium amidosulphite, T., 327; P., **1900**, 38.

—— —— products of heating ammonium sulphites, thiosulphate and trithionate, T., 335; P., **1900**, 39.

—— —— ammonium imidosulphite, P., **1900**, 113.

Dobbie, *James Johnstone*. See *Walter Noel* **Hartley**.

Dootson, *Frederick William*, condensation of methyl acetonedicarboxylate: constitution of orcinoltricarboxylic esters, T., 1196; P., **1900**, 170.

Dootson, *Frederick William*. See also *William James* **Sell**.

Drugman, *Julien*, and *William* **Ramsay**, specific gravities of the halogens at their boiling points, and of oxygen and nitrogen, T., 1228; P., **1900**, 172.

Dunstan, *Wyndham Rowland*, and *Ernest* **Goulding**, action of alkalis on the nitro-compounds of the paraffin series. Part II. Reactions and constitution of methazonic acid and the mode of formation of isoxazoles, T., 1262; P., **1900**, 174.

Dunstan, *Wyndham Rowland*, and *Harold M.* **Read**, contributions to our knowledge of the aconite alkaloids. Part XV. On japaconitine and the alkaloids of Japanese aconite, T., 45; P., **1899**, 206; discussion, P., 207.

E.

Edmed, *Frank George*, note on the action of dilute nitric acid on oleic and elaidic acids, P., **1899**, 190; discussion, P., 191.

Elliott, *Walter John*, action of chloroform and potassium hydroxide on *o*-aminobenzoic acid, T., 213; P., **1899**, 243.

Eynon, *Lewis*. See *Raphael* **Meldola**.

F.

Fenton, *Henry John Horstman*, degradation of glycollic aldehyde, T., 1294; P., **1900**, 148.

Fenton, *Henry John Horstman*, and *Humphrey Owen* **Jones**, the oxidation of organic acids in presence of ferrous iron, T., 69; P., **1899**, 224.

—— —— oxalacetic acid, T., 77; P., **1899**, 224.

Forster, *Martin Onslow*, studies in the camphane series. I. Nitrocamphane, T., 251; P., **1900**, 13.

Forster, *Martin Onslow*, and *James* **Hart-Smith**, separation of neobornylamine from bornylamine, T., 1152; P., **1900**, 166.

Fortey, *Emily C.* See *Sydney* **Young**.

Francis, *Francis E.*, isomeric dibenzyl ketone benzalanilines, and deoxybenzoin benzalanilines. Part II., T., 1192; P., **1900**, 169.

Friedel, *Charles*, Memorial Lecture on (Crafts), T., 993.

G.

Gardner, *John Addyman*, note on the bromo-derivatives of camphopyric acid, P., **1900**, 46.

Gilbody, *Alexander William*, and *William Henry* **Perkin**, *jun.*, brazilin and haematoxylin, P., **1899**, 241.

Gilbody, *Alexander William*, *William Henry* **Perkin**, *jun.*, and *J.* **Yates**, on brazilin, IV., P., **1900**, 105.

Goulding, *Ernest*. See *Wyndham Rowland* **Dunstan**.

Goyder, *George A.*, sulvanite a new mineral, T., 1094; P., **1900**, 164.

H.

Haga, *Tamemasa*. See *Edward* **Divers**.

Hall, *Harold*. See *Frederic Stanley* **Kipping**.

Harkness, *William*, obituary notice of, T., 592.

Hartley, *Walter Noel*, two hydrated cobalt oxides, green- and buff-coloured, P., **1899**, 202.

Hartley, *Walter Noel*, and *James Johnstone* **Dobbie**, absorption spectra of ammonia, methylamine, hydroxylamine, aldoxime, and acetoxime, T., 318; P., **1900**, 14.

—— —— spectrographic studies in tautomerism: the absorption curves of the ethyl esters of dibenzoylsuccinic acid, T., 498; P., **1900**, 57.

—— —— the curves of the molecular vibrations of benz*anti*aldoxime and benz*syn*aldoxime, T., 509; P., **1900**, 58.

—— —— ultra-violet absorption spectra of some closed chain carbon compounds. Part II. Dimethylpyrazine, hexamethylene, and tetrahydrobenzene, T., 846; P., **1900**, 129.

Hartley, *Walter Noel*, *James Johnstone* **Dobbie**, and *Photios G.* **Paliatseas**, a study of the absorption spectra of *o*-oxycarbanil and its alkyl derivatives in relation to tautomerism, T., 839; P., **1900**, 130.

Hart-Smith, *James*. See *Martin Onslow* **Forster**.

Harvey, *Alfred William*. See *William Jackson* **Pope**.

Hewitt, *John Theodore*, preparation of benzeneazo-*o*-nitrophenol, T., 99; P., **1899**, 229.

—— relation between the constitution and fluorescence of some substances, P., **1900**, 3.

Hewitt, *John Theodore*, and *William George* **Aston**, bromination of benzeneazophenol, I. and II., T., 712, 810; P., **1900**, 89, 131.

Hewitt, *John Theodore*, and *Bryan W.* **Perkins**, contributions to the knowledge of fluorescent compounds. Part I. The nitro-derivatives of fluorescein, T., 1324; P., **1900**, 178.

Hibbert, *H.* See *J. P.* **Millington.**
Hodges, *John Frederick*, obituary notice of, T., 593.
Hodgkinson, *William Richard Eaton*, and *Leonhard* **Limpach,** a method of separation of the various isomerides contained in ordinary commercial xylidine, T., 65; P., **1899,** 202.
Horsfall, *Louis Hubert.* See *Arthur George* **Perkin.**
Howles, *Fred H., Jocelyn Field* **Thorpe,** *William* **Udall,** and in part *H. A.* **Neale,** β-isopropylglutaric acid and *cis-* and *trans*-methylisopropylglutaric acids, T., 942; P., **1900,** 115.
Hurtley, *W. H.* See *Frederick Daniel* **Chattaway.**

I.

Isherwood, *Percy C. C.* See *Henry Edward* **Armstrong.**

J.

Jackson, *Henry*, formation of α- and β-acrose from glycollic aldehyde, T., 129; P., **1899,** 238.
Japp, *Francis Robert*, and *James* **Moir,** constitution of amarine, of its supposed dialkyl- and diacyl-derivatives, and of isamarine, T., 608; P., **1899,** 211, 227; **1900,** 15.
Jones, *Humphrey Owen.* See *Henry John Horstman* **Fenton.**
Jowett, *Hooper Albert Dickinson*, pilocarpine and the alkaloids of jaborandi leaves, T., 473; P., **1900,** 49; discussion, P., 50.
—— new glucoside from willow bark, T., 707; P., **1900,** 89.
—— constitution of pilocarpine, T., 851; P., **1900,** 123.

K.

Kinch, *Edward*, amount of chlorine in rain water collected at Cirencester, T., 1271; P., **1900,** 183.
Kipping, *Frederic Stanley*, isomeric partially racemic salts containing quinquevalent nitrogen. Parts I.—VI. Hydrindamine bromo- and chlorocamphorsulphonates, and *cis*-π-camphanates, T., 861; P., **1900,** 51.
—— note on the decomposition of semicarbazones, P., **1900,** 63.
Kipping, *Frederic Stanley*, and *Harold* **Hall,** new syntheses of indene, T., 467; P., **1900,** 54.
Kipping, *Frederic Stanley* and *Harold* **Peters,** iodonium compounds of the type $IR^{1}R^{11}R^{111}$ and the configuration of the iodine atom, P., **1900,** 62.

L.

Lander, *George Druce*, alkylation by means of dry silver oxide and alkyl halides, T., 729; P., **1900,** 6, 90.
Lapworth, *Arthur*, derivatives of cyanocamphor and of homocamphoric acid, T., 1053; P., **1900,** 128.
—— on the function of the characteristic meta-orientating groups, P., **1900,** 108.
—— condensation of ethyl crotonate with ethyl oxalate, P., **1900,** 132.
Lapworth, *Arthur*, and *Edgar Marsh* **Chapman,** action of fuming nitric acid on α-dibromocamphor, T., 309; P., **1900,** 4.
—— —— camphonic, homocamphoronic, and camphononic acids, T., 446; P., **1900,** 56.
Lawrence, *William Trevor*, the condensation of ethyl α-bromoisobutyrate with ethyl malonates and ethyl cyanoacetates: α-methyl-α_1-isobutylglutaric acid, P., **1900,** 154.
—— methylisoamylsuccinic acid, II., P., **1900,** 156.
Lawrence, *William Trevor.* See also *W.* **Carter.**
Lean, *Bevan*, ethyl dibromobutanetetracarboxylate and the synthesis of tetrahydrofurfuran-2:5-dicarboxylic acid, T., 103; P., **1899,** 197.
Lees, *Frederick H.*, and *William Henry* **Perkin,** *jun.*, action of aluminium chloride on camphoric anhydride, III., P., **1900,** 18.
Lees, *Frederick H.* See also *Samuel Barnett* **Schryver.**
Le Sueur, *Henry Rondel*, products of the action of fused potash on dihydroxystearic acid, P., **1900,** 91.
Le Sueur, *Henry Rondel.* See *Arthur William* **Crossley.**
Lewis, *Edward W.* See *Henry Edward* **Armstrong.**
Lewkowitsch, *Julius*, the theory of saponification, P., **1899,** 190; discussion, P., 190.
Limpach, *Leonhard.* See *William Richard Eaton* **Hodgkinson.**
Lowry, *Thomas Martin*, and *John H.* **West,** the persulphuric acids, T., 950; P., **1900,** 126.

M.

McCrae, *John*, and *T. S.* **Patterson**, acetyl and phenacetyl derivatives of diethyl *d*-tartrate, T., 1096; P., **1900**, 161.

McCrae, *John*. See also *Harry Medforth* **Dawson**.

Mallet, *Frederic Richard*, anhydrous sulphates of the form $2M''SO_4, R'_2SO_4$: especially those of isometric crystallisation, T., 216; P., **1899**, 227.

Marcet, *William*, obituary notice of, T., 594.

Marchlewski, [*Paul*] *Leon* [*Theodore*], and *C. A.* **Schunck**, notes on the chemistry of chlorophyll, T., 1080; P., **1900**, 148.

Matthews, *Francis Edward*, hexachlorides of benzonitrile, benzamide, and benzoic acid, T., 1273; P., **1900**, 175.

Meldola, *Raphael*, and *Lewis* **Eynon**, aminoamidines of the naphthalene series, T., 1159; P., **1900**, 166.

Meldola, *Raphael*, and *Elkan* **Wechsler**, note on the elimination of a nitro-group during diazotisation, T., 1172; P., **1900**, 167.

Meldola, *Raphael*, and *William Arthur* **Williams**, notes on polyazo-compounds, P., **1899**, 196.

Meyer, *Victor*, memorial lecture on (Thorpe), T., 169; P., **1900**, 33.

Millington, *J. P.*, and *H.* **Hibbert**, an isomeride of furfurine, P., **1900**, 161.

Mills, *William Sloan*, diphenyl- and dialphyl-ethylenediamines, and their nitro-derivatives, nitrates, and mercurichlorides, T., 1020; P., **1900**, 127.

Moir, *James*. See *Francis Robert* **Japp**.

Morgan, *Gilbert Thomas*, action of formaldehyde on amines of the napthalene series. Part II., T., 814; P., **1900**, 131.

—— contribution to the chemistry of the aromatic metadiamines, T., 1202; P., **1900**, 170.

—— action of aromatic aldehydes on derivatives of β-naphthylamine, T., 1210; P., **1900**, 171.

Morrell, *Robert Selby*, and *James Murray* **Crofts**, action of hydrogen peroxide on carbohydrates in the presence of ferrous salts, II., T., 1219; P., **1900**, 171.

N.

Napper, *Sidney Scrivener*. See *Henry Edward* **Armstrong**.

Neale, *H. A.* See *Fred H.* **Howles**.

Newth, *George S.*, note on partially miscible aqueous inorganic solutions, T., 775; P., **1900**, 87; discussion, P., 88.

—— liquefaction of a gas by "self-cooling" (a lecture experiment), P., **1900**, 87.

Nilson, *Lars Fredrik*, Memorial Lecture on (Pettersson), T., 1277; P., **1900**, 163.

O.

Ogawa, *Masataka*. See *Edward* **Divers**.

Ogston, *George Henry*, obituary notice of, T., 594.

Orton, *Kennedy Joseph Previte*, and *Walter Lionel* **Blackman**, estimation of hypoiodites and iodates, and the reaction of iodine monochloride with alkalis, T., 830; P., **1900**, 103; discussion, P., 104.

Orton, *Kennedy Joseph Previte*. See also *Frederick Daniel* **Chattaway**.

O'Sullivan, *James*, presence of invertase in some plants of the Gramineæ, I., T., 691; P., **1900**, 61.

Oxland, *Robert*, obituary notice of, T., 595.

P.

Paliatseas, *Photios G.* See *Walter Noel* **Hartley**.

Patterson, *T. S.* See *John* **McCrae**.

Peachey, *Stanley John*. See *William Jackson* **Pope**.

Perkin, *Arthur George*, apiin and apigenin. Part II. Note on vitexin, T., 416; P., **1900**, 44.

—— yellow colouring principles contained in various tannin matters. Part VII. *Arctostaphylos Uva ursi*, *Hæmatoxylon Campeachianum*, *Rhus Metopium*, *Myrica Gale*, *Coriaria myrtifolia*, and *Robinia Pseudacacia*, T., 423; P., **1900**, 45.

—— luteolin, III., P., **1899**, 242.

Perkin, *Arthur George*, and *Louis Hubert* **Horsfall**, genistein. Part II., T., 1310; P., **1900**, 182.

—— —— luteolin. Part III., T., 1314; P., **1900**, 181.

Perkin, *William Henry*, refractive and magnetic rotatory powers of some benzenoid hydrocarbons: refractive powers of mixtures: improved spectrometer scale reader, T., 267; P., **1899**, 237; discussion, P., 238.

Perkin, *William Henry*, *jun.*, and *Jocelyn Field* **Thorpe**, experiments on the synthesis of camphoric acid. III. The action of sodium and methyl iodide on ethyl dimethylbutanetricarboxylate, P., **1900**, 152.

Perkin, *William Henry, jun.*, *Jocelyn Field* **Thorpe,** and *C.* **Walker,** a new series of pentamethylene derivatives, I., P., **1900,** 149.

Perkin, *William Henry, jun.*, and *J.* **Yates,** on hæmatoyxlin, V., P., **1900,** 107.

Perkin, *William Henry, jun.* See also *J. Frank* **Bottomley,** *N. E.* **Bowtell,** *Alexander William* **Gilbody,** and *Frederick H.* **Lees.**

Perkins, *Bryan W.* See *John Theodore* **Hewitt.**

Peters, *Harold.* See *Frederic Stanley* **Kipping.**

Pettersson, *Otto,* Nilson Memorial Lecture, T., 1277; P., **1900,** 163.

Plimpton, *Richard Tayler,* obituary notice of, T., 595.

Pope, *Thomas Henry.* See *Julian Levett* **Baker.**

Pope, *William Jackson,* and *Alfred William* **Harvey,** racemisation occurring during the formation of benzylidene, benzoyl, and acetyl derivatives of *d*-*ac*-tetrahydro-β-naphthylamine, P., **1900,** 74.

Pope, *William Jackson,* and *Stanley John* **Peachey,** asymmetric optically active sulphur compounds: *d*-methylethylthetine platinichloride, T., 1072; P., **1900,** 12.

—— —— asymmetric optically active tin compounds: *d*-methylethyl-*n*-propyl tin iodide, P., **1900,** 42.

—— —— the racemisation of optically active tin compounds: *d*-methylethylpropyl tin *d*-bromocamphorsulphonate, P., **1900,** 116; discussion, P., 117.

R.

Ramsay, *William.* See *Julien* **Drugman.**

Rây, *Prafulla Chandra,* interaction of mercurous nitrite and ethyl iodide, P., **1899,** 239.

—— mercurous iodide, P., **1899,** 239.

Read, *Harold M.* See *Wyndham Rowland* **Dunstan.**

Reynolds, *Henry Charles,* obituary notice of, T., 596.

Reynolds, *James Emerson,* researches on silicon compounds. Part VI. On silicodiphenyldiimide and silicotriphenylguanidine, T., 836; P., **1900,** 133.

Roscoe, *Sir Henry Enfield,* Bunsen Memorial Lecture, T., 513; P., **1900,** 84.

Rose, *Thomas Kirke,* note on Volhard's method for the assay of silver bullion, T., 232; P., **1900,** 5.

Ruhemann, *Siegfried,* and *Frederick* **Beddow,** condensation of phenols with esters of the acetylene series. Part I. Action of phenols on ethyl phenylpropiolate, T., 984; P., **1900,** 123.

—— —— condensation of phenols with esters of the acetylene series. Part II. Action of phenols on ethyl phenylpropiolate and ethyl acetylenedicarboxylate, T., 1119; P., **1900,** 165.

Ruhemann, *Siegfried,* and *Henry Ernest* **Stapleton,** formation of heterocyclic compounds, T., 239; P., **1900,** 11.

—— —— condensation of ethyl acetylenedicarboxylate with bases and β-ketonic esters, T., 804; P., **1900,** 121.

—— —— condensation of phenols with esters of the acetylene series. Part III. Synthesis of benzo-γ-pyrone, T., 1179; P., **1900,** 168.

Russell, *Edward John,* notes on the estimation of gaseous compounds of sulphur, T., 352; P., **1900,** 41.

—— influence of the nascent state on the combination of dry carbon monoxide and oxygen, T., 361; P., **1900,** 42.

Russell, *Edward John,* and *Norman* **Smith,** the combination of sulphur dioxide and oxygen, T., 340; P., **1900,** 41.

S.

Schryver, *Samuel Barnett,* and *Frederick H.* **Lees,** researches on morphine. Part I., T., 1024; P., **1900,** 143.

Schunck, *C. A.* See *Leon* **Marchlewski.**

Scott, *Alexander,* preparation of pure hydrobromic acid, T., 648; P., **1900,** 69.

—— a new sulphide of arsenic, T., 651; P., **1900,** 69.

Sell, *William James,* and *Frederick William* **Dootson,** the chlorine derivatives of pyridine. Part IV. Constitution of the tetrachloropyridines, T., 1; P., **1899,** 205.

—— —— chlorine derivatives of pyridine. Part V. Constitution of citrazinic acid: formation of 2:6-dichloropyridine and 2:6-diiodoisonicotinic acid, T., 233; P., **1900,** 9; discussion, P., 11.

—— —— chlorine derivatives of pyridine. Part VI. Orientation of some chloroaminopyridines, T., 771; P., **1900,** 111.

Silberrad, *Oswald*, contributions to the chemistry of hydrotetrazines and triazoles, T., 1185; P., **1900**, 169.
Slosson, *E. E.* See *Julius* **Stieglitz**.
Smedley, *Ida*, benzylanilinesulphonic acids, P., **1900**, 160.
Smiles, *Samuel*, action of alkyl iodides on the mercuric iodide sulphides of the fatty series, T., 160; P., **1899**, 240.
—— a contribution to the stereochemistry of sulphur: an optically active sulphine base, T., 1174; P., **1900**, 168.
Smith, *Norman*. See *Edward John* **Russell**.
Snape, *Henry Lloyd*, racemic and optically active forms of amarine, T., 778; P., **1899**, 228; **1900**, 118.
Sodeau, *William Horace*, decomposition of chlorates, with special reference to the evolution of chlorine and oxygen, T., 137; P., **1899**, 157.
—— decomposition of chlorates. II. Lead chlorate, T., 717; P., **1900**, 88.
Sprankling, *Charles H. G.* See *William Arthur* **Bone**.
Stanford, *Edward Charles Cortis*, obituary notice of, T., 597.
Stapleton, *Henry Ernest*. See *Siegfried* **Ruhemann**.
Steele, *Bertram D.* See *John Norman* **Collie**.
Stieglitz, *Julius*, and *E. E.* **Slosson**, note on nitrogen halogen compounds, P., **1900**, 1.
Sworn, *Sidney Augustus*, obituary notice of, T., 598.
Szarvasy, *Emerique Charles*, electrolytic preparation of induline dyes, T., 207; P., **1899**, 194.
—— electrolysis of the nitrogen hydrides and of hydroxylamine, T., 603; P., **1900**, 3.

T.

Taylor, *Robert Llewellyn*, action of iodine on alkalis, T., 725; P., **1900**, 70.
Thorp, *William*, obituary notice of, T., 599.
Thorpe, *Jocelyn Field*, constitution of ethyl sodiocyanacetate and of ethyl sodiomethylcyanacetate, T., 923; P., **1900**, 113.
Thorpe, *Jocelyn Field*, and *William J.* **Young**, *cis-* and *trans*-$\alpha\alpha_1\beta\beta$-tetramethylglutaric acids, T., 936; P., **1900**, 114.
Thorpe, *Jocelyn Field*. See also *Fred H.* **Howles**, and *William Henry* **Perkin**, *jun.*
Thorpe, *Thomas Edward*, Victor Meyer Memorial Lecture, T., 169; P., **1900**, 33.
—— Presidential Address, T., 555; P., **1900**, 77.
—— progress of chemistry in Great Britain and Ireland during the 19th century, T., 562.
Tiemann, *Johann Karl Wilhelm Ferdinand*, obituary notice of, T., 600.

U.

Udall, *William*. See *Fred H.* **Howles**.

W.

Waage, *Peter*, obituary notice of, T., 591.
Wade, *John*, the constitution of hydrogen cyanide, P., **1900**, 156.
Walker, *C.* See *William Henry* **Perkin**, *jun.*
Walker, *James*, the constitution of camphoric acid, T., 390; P., **1900**, 60.
—— estimation of atmospheric carbon dioxide, T., 1110; P., **1900**, 164.
Walker, *James*, and *William* **Cormack**, the dissociation constants of very weak acids, T., 5; P., **1899**, 208; discussion, P., 208.
—— —— campholytic and isolauronolic acids, T., 374; P., **1900**, 58.
Walker, *James*, and *John K.* **Wood**, preparation and properties of solid ammonium cyanate, T., 21; P., **1899**, 209.
—— —— configuration of the camphoric acids, T., 383; P., **1900**, 59.
Warington, *Robert*, recent researches on nitrification, P., **1900**, 65.
Watson, *David*, obituary notice of, T., 603.
Wechsler, *Elkan*. See *Raphael* **Meldola**.
West, *Charles Alfred*, the dissociation constant of azoimide (hydrazoic acid), T., 705; P., **1900**, 74.
West, *John H.* See *Thomas Martin* **Lowry**.
Whiteley, *Martha Annie*, the oxime of mesoxamide and some allied compounds, T., 1040; P., **1900**, 145.
Williams, *P.* See *Harry Medforth* **Dawson**.
Williams, *William Arthur*. See *Raphael* **Meldola**.
Witham, *Ernest*. See *George* **Young**.
Wood, *John K.* See *James* **Walker**.
Wood, *Thomas Barlow*. See *Richard Haliburton* **Adie**.

Y.

Yates, *J.* See *Alexander William* **Gilbody**, and *William Henry* **Perkin**, *jun.*

Young, *George*, and *Ernest* **Witham**, C-derivatives of hydroxytriazole, T., 224 ; P., **1900**, 5.

—— —— hydrolysis of semicarbazones, P., **1900**, 73.

Young, *Sydney*, vapour pressures, specific volumes, and critical constants of *n*-octane, T., 1145 ; P., **1900**, 166.

Young, *Sydney*, and *Emily C.* **Fortey**, note on the refraction and magnetic rotation of hexamethylene, chlorohexamethylene, and dichlorohexamethylene, T., 372 ; P., **1900**, 44.

—— —— vapour pressures, specific volumes, and critical constants of diisopropyl and diisobutyl, T., 1126 ; P., **1900**, 165.

Young, *William J.* See *Jocelyn Field* **Thorpe**.

INDEX OF SUBJECTS.

TRANSACTIONS. 1900.

(Marked T.); and also to Proceedings of the Session 1899—1900, Nos. 213 to 226, Nov., 1899—June, 1900 (marked P.).

A.

Acacetin from *Robinia Pseudacacia* and its acetyl derivative (PERKIN), T., 430; P., **1900**, 45.

Acetaldoxime, spectrum of (HARTLEY and DOBBIE), T., 321; P., **1900**, 14.

Acetanilide, action of dry silver oxide and ethyl iodide on (LANDER), T., 737; P., **1900**, 6, 90.

o-mono- and 2:4-*di*-bromo- and -chloro-, formation of (CHATTAWAY and ORTON), T., 798; P., **1900**, 112.

m-chloro-, action of bleaching powder on a hot acetic acid solution of (CHATTAWAY, ORTON, and HURTLEY), T., 804.

substituted nitrogen chlorides from, and their transformation (CHATTAWAY, ORTON, and HURTLEY), T., 800; P., **1900**, 125.

di-, *tri-*, and *tetra*-chloro-derivatives of, from substituted nitrogen chlorides (CHATTAWAY, ORTON, and HURTLEY), T., 800; P., **1900**, 125.

Acetanisidide, *di*nitro- (MELDOLA and WECHSLER), T., 1172; P., **1900**, 167.

Acetic acid, cyano-, ethyl ester, constitution of the sodium derivative of (THORPE), T., 923; P., **1900**, 113.

condensation of the sodium derivative of, with ethyl β-*iso*propylacrylate, and with ethyl α- and β-methylacrylates (HOWLES, THORPE, and UDALL), T., 943; P., **1900**, 115.

Acetic acid, cyano-, ethyl ester, iodo- and bromo-derivatives of (THORPE and YOUNG), T., 936; P., **1900**, 115.

Acetoacetic acid, ethyl ester, constitution of, and action of dry silver oxide and ethyl iodide, and dry silver oxide and ethyl iodoacetate on (LANDER), T., 738; P., **1900**, 6, 90.

1-Acetonaphthalide, 2:4-*di*nitro-, action of tin and of iron on (MELDOLA and EYNON), T., 1159; P., **1900**, 166.

Acetonedicarboxylic acid, oxidation of, in presence of ferrous salts (FENTON and JONES), T., 76; P., **1899**, 224.

trimethyl ester, condensation of, to trimethyl orcinoltricarboxylate (DOOTSON), T., 1196; P., **1900**, 170.

Acetotoluidides, *o-* and *p-*, substituted nitrogen chlorides and bromides from (CHATTAWAY and ORTON), T., 789; P., **1900**, 102.

Acetoxime, spectra of (HARTLEY and DOBBIE), T., 321; P., **1900**, 14.

Acetylaconitic acid, ethyl ester (RUHEMANN and STAPLETON), T., 804; P., **1900**, 121.

Acetylbenzoyl-*i*-diphenylethylenediamine (JAPP and MOIR), T., 612; P., **1899**, 211.

Acetyl-chloro- and -bromo-aminobenzenes (*phenyl acetyl nitrogen chlorides* and *bromides*), and their chloro- and bromo-derivatives, transformation of (CHATTAWAY and ORTON), T., 798; P., **1900**, 112.

Acetylchloroamino-*mono-*, *-di-*, and *-tri*-chlorobenzenes (*chlorophenyl acetyl nitrogen chlorides*) (CHATTAWAY, ORTON, and HURTLEY), T., 800; P., **1900**, 125.

Acetyl-chloro- and **-bromo-aminotoluenes**, *o-* and *p-* (*o-* and p-*tolyl acetyl nitrogen chlorides* and *bromides*) and their chloro- and bromo-derivatives (CHATTAWAY and ORTON), T., 790; P., **1900**, 102.

Acetylchloromorphide (SCHRYVER and LEES), T., 1024; P., **1900**, 143.

Acetylenedicarboxylic acid, oxidation of, in presence of ferrous salts (FENTON and JONES), T., 76; P., **1899**, 244.

Acetylenedicarboxylic acid, ethyl ester, preparation of (RUHEMANN and BEDDOW), T., 1121.

condensation of, with β-ketonic esters and with benzamidine and with guanidine (RUHEMANN and STAPLETON), T., 804; P., **1900**, 121.

action of phenols on (RUHEMANN and BEDDOW), T., 1119; P., **1900**, 165.

condensation of, with phenyl mercaptan (RUHEMANN and STAPLETON), T., 1181; P., **1900**, 168.

Acetylpropionylsalicylic acid osazone (AUDEN), P., **1899**, 231.

Acetyltartaric acid, diethyl ester, rotation of (MCCRAE and PATTERSON), T., 1096; P., **1900**, 161.

Acid, $C_7H_{10}O_4$, from the oxidation of *iso*pilocarpine with permanganate (JOWETT), T., 852; P., **1900**, 124.

$C_9H_{14}O_2$ (two), from the hydrolysis of methyl bromodihydro-ψ-lauronolate (LEES and PERKIN), P., **1900**, 19.

$C_9H_{15}BrO_2$ (two), from the action of hydrogen bromide in glacial acetic acid on ψ-campholactone (LEES and PERKIN), P., **1900**, 18.

$C_9H_{16}O_3$ (two), from the action of alkalis on ψ-campholactone (LEES and PERKIN), P., **1900**, 18.

$C_{10}H_{16}O_4$, from α-*di*bromocamphor and nitric acid (LAPWORTH and CHAPMAN), T., 310; P., **1900**, 4.

$C_{11}H_{12}O_7$, $C_{20}H_{20}O_9$, and $C_{20}H_{20}O_{10}$, from the oxidation of tetramethylhæmatoxylin (PERKIN and YATES), P., **1900**, 108.

$C_{11}H_{16}O_4$, and $C_{11}H_{18}O_5$, from the action of hydrogen cyanide and hydrochloric acid on camphonic acid (LAPWORTH and CHAPMAN), T., 450; P., **1900**, 56.

$C_{12}H_{12}O_6$, and $C_{19}H_{18}O_9$, from the oxidation of trimethylbrazilin (GILBODY, PERKIN, and YATES), P., **1900**, 106.

$C_{18}H_{34}O_3$, and $C_{18}H_{34}O_5$, from the fusion of dihydroxystearic acid with potash (LE SUEUR), P., **1900**, 91.

Acids from ethyl cyanoacetate, method of separating the *cis* and *trans*-modifications of (THORPE), T., 934; P., **1900**, 114.

fatty, determination of the constitution of (CROSSLEY and LE SUEUR), T., 83; P., **1899**, 225.

dibasic, dissociation constants of (WALKER), T., 397.

inorganic, very weak, dissociation constants of (WALKER and CORMACK), T., 5; P., **1899**, 208.

organic, oxidation of, in presence of ferrous salts (FENTON and JONES), T., 69; P., **1899**, 224.

Aconite alkaloids (DUNSTAN and READ), T., 45; P., **1899**, 206.

Aconitum Napellus, comparison of the properties of the alkaloids from, with those from Japanese aconite (DUNSTAN and READ), T., 63.

Acroses, α- and β-, from glycollic aldehyde (JACKSON), T., 129; P., **1899**, 238.

Address, presidential (THORPE), T., 555; P., **1900**, 77.

Aldehydes, compounds of, with *iso*cyanides (WADE), P., **1900**, 157.

aromatic, condensation of, with azodicarbamide (YOUNG and WITHAM), T., 224; P., **1900**, 5.

action of, on derivatives of β-naphthylamine (MORGAN), T., 1210; P., **1900**, 171.

Aldehydo-*o*-aminobenzoic acid, phenylhydrazone and semicarbazone of (ELLIOTT), T., 214; P., **1899**, 243.

Alkali nitrites, colour of (DIVERS), P., **1900**, 40.

Alkalis, action of iodine on (TAYLOR), T., 725; P., **1900**, 70.

Alkaloids of Japanese aconite and of *Aconitum Napellus*, comparison of properties of (DUNSTAN and READ), T., 63.

of jaborandi leaves (JOWETT), T., 473; P., **1900**, 49.

Alkyl iodides and dry silver oxide, alkylation by means of (LANDER), T., 736; P., **1900**, 6, 90.

action of, on mercuric iodide-sulphides of the fatty series (SMILES), T., 160; P., **1899**, 240.

compounds of, with *iso*cyanides (WADE), P., **1900**, 157.

Alkylation by means of dry silver oxide and alkyl haloids (LANDER), T., 729; P., **1900**, 6, 90.

Aluminium chloride, action of, on camphoric anhydride (LEES and PERKIN), P., **1900**, 18.

Amarine and *iso***Amarine**, constitution of (JAPP and MOIR), T., 608; P., **1899**, 211, 227; **1900**, 15.
Amarine, racemic and optically active forms of (SNAPE), T., 778; P., **1899**, 228; **1900**, 118.
Amides, action of dry silver oxide and alkyl iodides on (LANDER), T., 736; P., **1900**, 6, 90.
Amidosulphite, formation and decomposition of (DIVERS and OGAWA), T., 327; P., **1900**, 38.
Amidosulphuric acid, production of (DIVERS and HAGA), T., 978; P., **1900**, 147.
Ammonia, spectra of (HARTLEY and DOBBIE), T., 318; P., **1900**, 14.
electrolysis of (SZARVASY), T., 604; P., **1900**, 3.
solubility of aqueous, in potassium carbonate solution (NEWTH), T., 775; P., **1900**, 87.
distribution of, between chloroform and water (DAWSON and MCCRAE), T., 1242; P., **1900**, 172.
action of dry sulphur dioxide on dry (DIVERS and OGAWA), T., 327; P., **1900**, 38; (DIVERS), P., **1900**, 104.
influence of, on the action of nitrifying organisms (WARINGTON), P., **1900**, 66.
Ammonium hydroximidosulphate, production of (DIVERS and HAGA), T., 689; P., **1900**, 71.
thiosulphate, preparation of, and action of heat on (DIVERS and OGAWA), T., 335; P., **1900**, 39.
amidosulphite, formation and decomposition of (DIVERS and OGAWA), T., 237; P., **1900**, 38.
imidosulphite (DIVERS and OGAWA), P., **1900**, 113.
sulphites, preparation of, and action of heat on (DIVERS and OGAWA), T., 335; P., **1900**, 39.
trithionate, preparation of, and action of heat on (DIVERS and OGAWA), T., 335; P., **1900**, 39.
Ammonium organic compounds:—
Ammonium cyanate, solid, preparation and properties of (WALKER and WOOD), T., 21; P., **1899**, 209.
cyanates, substituted, transformation of (WALKER and WOOD), T., 33; P., **1899**, 209.
Amyl sulphide-mercuric iodide (SMILES), T., 164; P., **1899**, 240.
*iso***Amylcitraconic acid** (LAWRENCE), P., **1900**, 156.
*iso***Amylsuccinic acid**, melting point of (LAWRENCE), P., **1900**, 156.
Anhydro-bases, and their azo-derivatives, constitution of (MELDOLA and EYNON), T., 1170; P., **1900**, 166.
β-Anhydrohomocamphoronic acid (LAPWORTH and CHAPMAN), T., 453; P., **1900**, 57.
Anhydro-*cis*-pentamethylenetricarboxylic acid (BOTTOMLEY and PERKIN), T., 304; P., **1900**, 16.
Anilides, action of hypochlorous and hypobromous acids on (CHATTAWAY and ORTON), T., 134, 789, 797; P., **1899**, 232; P., **1900**, 102, 112; (CHATTAWAY, ORTON, and HURTLEY), T., 800; P., **1900**, 125; (ARMSTRONG), T., 1047; P., **1900**, 160.
substitution in (ARMSTRONG), T., 1047; P., **1900**, 160.
Aniline and its hydrochloride, electrolysis of fused mixtures of (SZARVASY), T., 208; P., **1899**, 194.
meta-sulphonation of (ARMSTRONG and BERRY), P., **1900**, 159.
Anilinoinduline, B_2, 4, electrolytic preparation of (SZARVASY), T., 207; P., **1899**, 194.
Anisidine, *di*nitro-, diazotisation of (MELDOLA and WECHSLER), T., 1172; P., **1900**, 167.
Annual General Meeting, T., 555; P., **1900**, 77.
Anthranilic acid (*o-aminobenzoic acid*), action of chloroform and potash on (ELLIOTT), T., 213; P., **1899**, 243.
Apigenin and **Apiin**, action of nitric acid on (PERKIN), T., 416; P., **1900**, 44.
Apigetrin, and nitro- (PERKIN), T., 420; P., **1900**, 45.
Arctostaphylos Uva-ursi, constituents of (PERKIN), T., 424; P., **1900**, 45.
Arsenic, new sulphide of (As_3S) (SCOTT), T., 651; P., **1900**, 69.
Atmospheric air, estimation of carbon dioxide in (WALKER), T., 1110; P., **1900**, 164.
Atomic weight of nitrogen (DEAN), T., 117; P., **1899**, 213.
Azines, formation of, by the decomposition of semicarbazones (KIPPING), P., **1900**, 64; (YOUNG and WITHAM), P., **1900**, 73.
Azo-compounds differentiated from hydrazone compounds by bromine (ARMSTRONG), P., **1899**, 243.
Azodicarbamide, condensation of, with aromatic aldehydes (YOUNG and WITHAM), T., 224; P., **1900**, 5.
Azoimide, electrolysis of (SZARVASY), T., 606; P., **1900**, 3.
dissociation constant of (WEST), T., 705; P., **1900**, 74.

Azophenine, electrolytic preparation of (SZARVASY), T., 207; P., **1899**, 194.

B.

Balance Sheet of the Chemical Society, March, **1900**, and of the Research Fund, March, **1900**. See Annual General Meeting, T., 588.

Barium chlorate, decomposition products of (SODEAU), T., 137; P., **1899**, 157.

hydroximidosulphate, production of (DIVERS and HAGA), T., 690; P., **1900**, 71.

Benzal-. See Benzylidene-.

Benzaldehyde, action of, on ethyl-β-naphthylamine (MORGAN), T., 1210; P., **1900**, 171.

action of dry silver oxide and ethyl iodide on (LANDER), T., 746.

Benzaldoximes, *anti-* and *syn-*, curves of the molecular vibrations of (HARTLEY and DOBBIE), T., 509; P., **1900**, 58.

Benzamide, action of dry silver oxide and ethyl iodide on (LANDER) T., 736; P., **1900**, 6.

*hexa*chloride, preparation and properties of (MATTHEWS), T., 1275; P., **1900**, 176.

Benzamidine, condensation of, with the ethyl esters of acetylenedicarboxylic and chlorofumaric acids (RUHEMANN and STAPLETON), T., 809; P., **1900**, 122.

action of, on ethyl phenylpropiolate (RUHEMANN and STAPLETON), T., 239; P., **1900**, 11.

Benzanilide (SILBERRAD), T., 1191.

o-bromo- and -chloro-, nitrogen bromides and chlorides from (CHATTAWAY and ORTON), T., 800.

Benzene, refraction and magnetic rotation of (PERKIN), T., 267; P., **1899**, 237.

chloro-, *tetra*chloride, preparation of (MATTHEWS), T., 1276; P., **1900**, 176.

Benzeneazo-*o*-*di*bromophenol, its acyl derivatives and ethyl ether (HEWITT and ASTON), T., 712; P., **1900**, 89.

p-bromo-, and its acyl derivatives and ethyl ether (HEWITT and ASTON), T., 810; P., **1900**, 131.

Benzeneazoethyl-β-naphthylamine, *p*-nitro- (MORGAN), T., 1214.

Benzeneazo-*o*-nitrophenol, preparation, properties, and reactions of, and its acetyl and benzoyl derivatives (HEWITT), T., 99; P., **1899**, 229.

Benzeneazophenol, bromination of (HEWITT and ASTON), T., 712, 810; P., **1900**, 89, 131.

nitration of (HEWITT), T., 99; P., **1899**, 229.

Benzeneazophenol, *p*-nitro- and its acetyl and benzoyl derivatives, and *p*-amino-, and its acetyl derivatives (MELDOLA and WILLIAMS), P., **1899**, 196.

Benzene-*o*-disulphonic acid and its salts and derivatives (ARMSTRONG and NAPPER), P., **1900**, 160.

Benzenoid hydrocarbons, refractive and magnetic rotation of (PERKIN), T., 267; P., **1899**, 237.

Benzoic acid, oxidation of, in presence of ferrous salts (FENTON and JONES), T., 76; P., **1899**, 224.

*hexa*chloride, preparation of (MATTHEWS), T., 1276; P., **1900**, 176.

Benzoic acid, *o*-amino-. See Anthranilic acid.

m-nitro-, ethyl ester, chloro- and bromo-imide of (STIEGLITZ and SLOSSON), P., **1900**, 2.

Benzoic chloride, action of, on *s*-3:6-dimethyldihydrotetrazine (SILBERRAD), T., 1185; P., **1900**, 169.

Benzoin, action of dry silver oxide and alkyl iodides on (LANDER), T., 733; P., **1900**, 6, 90.

Benzonitrile *hexa*chloride, preparation and properties of (MATTHEWS), T., 1273; P., **1900**, 175.

Benzo-γ-pyrone and its carboxylic acid (RUHEMANN and STAPLETON), T., 1180; P., **1900**, 168.

Benzoylacetic acid (RUHEMANN and STAPLETON), T., 1180; P., **1900**, 168.

Benzoylaconitic acid, ethyl ester of (RUHEMANN and STAPLETON), T., 804; P., **1900**, 121.

Benzoyl-*s*-dibenzyl-*i*-diphenylethylenediamine ("*dibenzylamarine*") (JAPP and MOIR), T., 608; P., **1899**, 211.

Benzoyl-*s*-dimethyl- and **-*s*-diethyl-*i*-diphenylethylenediamine** ("*dimethyl-*" and "*diethyl-amarine*") (JAPP and MOIR), T., 608; P., **1899**, 211.

αα-Benzoylphenylhydrazide, action of heat on (SILBERRAD), T., 1190; P., **1900**, 169.

Benzylanilinesulphonic acids (SMEDLEY), P., **1900**, 160.

Benzylideneazine, formation of (YOUNG and WITHAM), P., **1900**, 73.

Benzylidenehydantoin and **Benzylideneimino-** and **-thio-hydantoin** (RUHEMANN and STAPLETON), T., 241; P. **1900**, 12.

Benzylidene-2-naphthylamine, 1-bromo- and 1-chloro-, and their hydrocyanides and *o*- and *p*-nitro-derivatives (MORGAN), T., 1216; P., **1900**, 171.
Benzylideneneobornylamine (FORSTER and HART-SMITH), T., 1157; P., **1900**, 166.
Benzylidenephenylhydrazone (MORGAN), T., 1210.
Benzylidenesemicarbazone, oxidation of (YOUNG and WITHAM), T., 226; P., **1900**, 5.
Bismuth sulphates (ADIE), P., **1899**, 226.
Boric acid, dissociation constant of (WALKER and CORMACK), T., 16; P., **1899**, 208.
Bornylamine salts, and their molecular rotation (FORSTER and HART-SMITH), T., 1152; P., **1900**, 166.
β-Bornylhydroxylamine (*1-hydroxylaminocamphane*) (FORSTER), T., 255; P., **1900**, 14.
Bornyloxamide (FORSTER and HART-SMITH), T., 1155; P., **1900**, 166.
Brazilin (GILBODY and PERKIN), P., **1899**, 241.
constitution of (GILBODY, PERKIN, and YATES), P., **1900**, 107.
Butanedicarboxylic acids. See:—
Dimethylsuccinic acid.
Methylglutaric acids.
*cyclo***Butanedicarboxylic acid** (cis-*tetramethylene*-1:3-*dicarboxylic acid*), formation of (BOTTOMLEY and PERKIN), T., 306; P., **1900**, 16.
Butanetetracarboxylic acid, *αδ-di*bromo-, ethyl ester (LEAN), T., 103; P., **1899**, 197.
n-**Butyl** *iso*cyanide (WADE), P., **1900**, 157.
*iso***Butylbenzene**, preparation and properties of (PERKIN), T., 268; P., **1899**, 237.
*iso***Butyric acid**, *α*-bromo-, ethyl ester, condensation of, with ethyl malonates and ethyl cyanoacetates (LAWRENCE), P., **1900**, 154.

C.

Cadmium iodide, combination of, with ammonia in aqueous solution (DAWSON and MCCRAE), T., 1246; P., **1900**, 173.
Calcium chloride, combination of, with ammonia in aqueous solution (DAWSON and MCCRAE), T., 1249; P., **1900**, 173.
hydroximidosulphate, production of (DIVERS and HAGA), T., 690; P., **1900**, 71.
Camphane, 1-nitro-, ψ-nitro- and its potassium and benzoyl derivatives, 1:1-bromonitro-, 1:1-chloronitro-, and 1:1-iodonitro- (FORSTER), T., 251; P., **1900**, 13.
Camphanic acid, isomeride of (PERKIN and THORPE), P., **1900**, 152.
ψ-Campholactone and its isomeride (LEES and PERKIN), P., **1900**, 18.
Campholide, *α*-bromo-, its formula and hydrolysis (LAPWORTH and CHAPMAN), T., 446; P., **1900**, 56.
*di*bromo- (LAPWORTH and CHAPMAN), T., 310; P., **1900**, 4.
Campholytic acid and its stereoisomeride, reactions and structure of (WALKER and CORMACK), T., 374; P., **1900**, 58.
Camphonic acid, its oxime, semicarbazone, and phenylhydrazones, and action of bromine and of hydrogen cyanide on (LAPWORTH and CHAPMAN), T., 446; P., **1900**, 56.
Camphonolactone, *mono-* and *tri*-bromo- (LAPWORTH and CHAPMAN), T., 446; P., **1900**, 56.
Camphononic acid, formation of (LAPWORTH), T., 1070.
action of bromine and hydrogen cyanide on, and its oxime (LAPWORTH and CHAPMAN), T., 452; P., **1900**, 57.
Camphopyric acid and anhydride bromo-derivatives of (GARDNER), P., **1900**, 46.
Camphor, constitution of (LAPWORTH), T., 1053; P., **1900**, 128.
vapour pressure of (ALLEN), T., 413; P., **1899**, 135.
Camphor, *α-di*bromo-, action of fuming nitric acid on (LAPWORTH and CHAPMAN), T., 309; P., **1900**, 4.
αα′-bromonitro- (LAPWORTH and CHAPMAN), T., 310; P., **1900**, 4.
cyano-, and its chloro- and bromo-derivatives and their hydrolysis (LAPWORTH), T., 1053; P., **1900**, 128.
Camphorenic acid, bromo-, formula of (LAPWORTH and CHAPMAN), T., 446; P., **1900**, 56.
Camphoric acid, constitution of (WALKER), T., 390; P., **1900**, 60.
experiments on the synthesis of (PERKIN and THORPE), P., **1900**, 152.
*l-iso***Camphoric acid** and its ethyl esters (WALKER and WOOD), T., 383; P., **1900**, 59.
Camphoric acids, configuration of (WALKER and WOOD), T., 383; P., **1900**, 59; (WALKER), T., 395; P., **1900**, 61.

Camphoric anhydride, action of aluminium chloride on (LEES and PERKIN), P., **1900**, 18.
Camphoronic acid, formation of (LAPWORTH), T., 1071.
Camphoroximeacetic acid and its sodium and bornylamine salts (FORSTER and HART-SMITH), T., 1154; P., **1900**, 166.
Cane-sugar. See Sucrose.
Carbamide (*urea*), rate of formation of, from solid ammonium cyanate (WALKER and WOOD), T., 30; P., **1899**, 209.
Carbohydrates, action of hydrogen peroxide on, in presence of ferrous salts (MORRELL and CROFTS), T., 1219; P., **1900**, 171.
Carbon *mon*oxide (*carbonic oxide*) and oxygen, influence of the nascent state on the combination of dry (RUSSELL), T., 361; P., **1900**, 42.
*di*oxide (*carbonic anhydride*), dissociation constant of (WALKER and CORMACK), T., 8; P., **1899**, 208.
estimation of, in the atmosphere (WALKER), T., 1110; P., **1900**, 164.
*di*sulphide, estimation of (RUSSELL), T., 359; P., **1900**, 41.
Carbonyl sulphide, estimation of (RUSSELL), T., 356; P., **1900**, 41.
Catecholacetic acid (*o-hydroxyphenoxyacetic acid*), and its ethyl ester, anhydride and anilide (CARTER and LAWRENCE), T., 1222; P., **1900**, 152.
Chemical constitution and fluorescence (HEWITT and PERKINS), T., 1324; P., **1900**, 178; (HEWITT), P., **1900**, 3.
equilibrium between hydrogen peroxide and "persulphuric acid" (LOWRY and WEST), T., 955; P., **1900**, 127.
Chemistry, progress of, in Great Britain and Ireland during the 19th century (THORPE), T., 562.
Chlorates, decomposition of (SODEAU), T., 137, 717; P., **1899**, 157; **1900**, 88.
Chlorine, evolution of, from chlorates (SODEAU), T., 137, 717; P., **1899**, 157; **1900**, 88.
amount of, in rain-water collected at Cirencester (KINCH), T., 1271; P., **1900**, 183.
Chlorophyll, chemistry of (MARCHLEWSKI and SCHUNCK), T., 1080; P., **1900**, 148.
Chrysoidine hydrochloride, bromo- and chloro- (MORGAN), T., 1205; P., **1900**, 170.
Chrysoidinesulphonic acid, chloro- and bromo-, potassium salts of (MORGAN), T., 1205.
Cinnamal-. See Cinnamylidene-.
Cinnamylidene-2-naphthylamine, 1-bromo- and 1-chloro-, and their hydrocyanides (MORGAN), T., 1217; P., **1900**, 171.
Cinnamylidenesemicarbazone, oxidation of (YOUNG and WITHAM), T., 230; P., **1900**, 5.
Citrazinic acid, constitution of (SELL and DOOTSON), T., 233; P., **1900**, 9.
Cobalt nitrite, double potassium and sodium salt of (ADIE and WOOD), T., 1076; P., **1900**, 17.
oxides, hydrated, green- and buff-coloured (HARTLEY), P., **1899**, 202.
potassium sulphate (MALLET), T., 222; P., **1899**, 227.
Colour of alkali nitrites (DIVERS), P., **1900**, 40.
Colouring matters of *Arctostaphylos Uva-ursi*, *Coriaria myrtifolia*, *Hæmatoxylon campechianum*, *Myrica Gale*, *Rhus Metopium*, and *Robinia Pseudacacia* (PERKIN), T., 423; P., **1900**, 45.
of chlorophyll and their spectra (MARCHLEWSKI and SCHUNCK), T., 1080; P., **1900**, 148.
Copper, heat of combination of, with zinc (BAKER), P., **1899**, 195.
Copper chloride, combination of, with ammonia in aqueous solution (DAWSON and MCCRAE), T., 1245; P., **1900**, 172.
oxide, combination of, with ammonia in aqueous solution (DAWSON and MCCRAE), T., 1255; P., **1900**, 173.
sulphate, combination of, with ammonia in aqueous solution (DAWSON and MCCRAE), T., 1243; P., **1900**, 172.
reaction of solutions of, with magnesium, iron, or zinc (CAVEN), P., **1899**, 232.
sulphovanadite. See Sulvanite.
Coriaria myrtifolia, constituents of (PERKIN), T., 428; P., **1900**, 45.
Cresols, *o*-, *m*-, and *p*-, condensation of, with ethyl phenylpropiolate (RUHEMANN and BEDDOW), T., 984, 1119; P., **1900**, 123, 165.
Cresoxy-. See Tolyloxy-.
Critical constants of di*iso*propyl and di*iso*butyl (YOUNG and FORTEY), T., 1126; P., **1900**, 165.

Critical constants of *n*-octane (YOUNG), T., 1145; P., **1900**, 166.
Crotonic acid, ethyl ester, condensation of, with ethyl oxalate (LAPWORTH), P., **1900**, 132.
Crystallography of *d*- and *l*-*iso*amarine (POPE), T., 787; P., **1900**, 118.
ψ-Cumene (1:3:4-*triethylbenzene*), refraction and magnetic rotation of (PERKIN), T., 267; P., **1899**, 237.
Cuminylidene-2-naphthylamine, 1-bromo- and 1-chloro-, and their hydrocyanides (MORGAN), T., 1216; P., **1900**, 171.
*iso***Cyanides**, compounds of, with aldehydes and alkyl iodides (WADE), P., **1900**, 157.
Cymene (1:4-*methyl*iso*propylbenzene*) refraction and magnetic rotation of (PERKIN), T., 267; P., **1899**, 237.

D.

Dehydracetic acid (COLLIE), T., 971; P., **1900**, 147.
Dehydrocamphoric acid, formation and oxidation of (LAPWORTH), T., 1056; P., **1900**, 128.
Density of the halogens, nitrogen and oxygen at their boiling points (DRUGMAN and RAMSAY), T., 1228; P., **1900**, 172.
Deoxybenzoin benzylideneanilines and their hydrochlorides, isomeric (FRANCIS), T., 1191; P., **1900**, 169.
Deoxymorphine (SCHRYVER and LEES), T., 1024; P., **1900**, 143.
Dextrose (d-*glucose*, *grape sugar*), action of potassium persulphate on (MORRELL and CROFTS), T., 1220; P., **1900**, 172.
Diacetylacetone, action of methyl iodide on the sodium derivative of, and orcinol derivatives from (COLLIE and STEELE), T., 961; P., **1900**, 146.
Diacetyltartaric acid, diethyl ester, rotation of (MCCRAE and PATTERSON), T., 1096; P., **1900**, 161.
Diacylamarines, constitution of (JAPP and MOIR), T., 632; P., **1899**, 212.
Dialkylamaronium salts, constitution of (JAPP and MOIR), T., 615; P., **1899**, 212.
Diazosalicylic acid and chloride and sulphonic acid (AUDEN), P., **1899**, 231.
Diazotisation, elimination of a nitro-group during (MELDOLA and WECHSLER), T., 1172; P., **1900**, 167.
Dibenzoyl-*s*-dibenzyl-*i*-diphenylethylenediamine (JAPP and MOIR), T., 608; P., **1899**, 211.
***s*-Dibenzoyl-*i*-diphenylethylenediamine** (JAPP and MOIR), T., 611; P., **1899**, 211.
***s*-Dibenzoylhydrazide** (SILBERRAD), T., 1186; P., **1900**, 169.
Dibenzoylsuccinic acid, ethyl esters, absorption curves of (HARTLEY and DOBBIE), T., 498; P., **1900**, 57.
Dibenzyl sulphide-mercuric iodide (SMILES), T., 164; P., **1899**, 240.
"**Dibenzylamarine.**" See Benzoyl-*s*-dibenzyl-*i*-diphenylethylenediamine.
***s*-Dibenzyl-*i*-diphenylethylenediamine** (JAPP and MOIR), T., 610; P., **1899**, 211.
Dibenzyl ketone benzylideneanilines and their hydrochlorides, isomeric (FRANCIS), T., 1191; P., **1900**, 169.
Dibenzyllophonium chloride (JAPP and MOIR), T., 614; P., **1899**, 212.
Dibenzyl-β-naphthylamine, and the action of formaldehyde on (MORGAN), T., 825; P., **1900**, 131.
Dibornyloxamide (FORSTER and HART-SMITH), T., 1152; P., **1900**, 166.
Di*iso***butyl**. See Octane.
***s*-Di*iso*butylsuccinic acids**, *cis*- and *trans*-, preparation and dissociation constants of (BONE and SPRANKLING), T., 1299; P., **1900**, 184.
Diethyl sulphide-mercuric iodide (SMILES), T., 164; P., **1899**, 240.
2:2′-Diethyl*di*amino-1:1′-dinaphthylmethane, and its dibenzoyl derivative (MORGAN), T., 827; P., **1900**, 131.
Diethyl-α- and -β-naphthylamines, and the action of formaldehyde on (MORGAN), T., 823; P., **1900**, 131.
Diethyltetrahydro-β-naphthylamine, action of formaldehyde on (MORGAN), T., 824.
Dihydroxybutanetetracarboxylic acid, and its δ-lactone (LEAN), T., 104, 108; P., **1899**, 197.
Dihydroxylamine derivatives, non-existence of (DIVERS and HAGA), T., 437; P., **1900**, 54.
Dihydroxylaminesulphonates, non-existence of (DIVERS and HAGA), T., 437; P., **1900**, 54.
2:6-Dihydroxypyridine-4-carboxylic acid. See Citrazinic acid.
2:6-Dihydroxypyridine-3:4-dicarboxylic acid, ethyl ester (RUHEMANN and STAPLETON), T., 243; P., **1900**, 12.
Dihydroxystearic acid, action of fused potash on (LE SUEUR), P., **1900**, 91.
Dimethyl sulphide-mercuric iodide (SMILES), T., 164; P., **1899**, 240.
"**Dimethylamarine.**" See Benzoyl-*s*-dimethyl-*i*-diphenylethylenediamine.

αα-Dimethyl-α$_1$-*iso*amylsuccinic acid, preparation and dissociation constant of (BONE and SPRANKLING), T., 1306; P., **1900**, 184.

Dimethylbutanetricarboxylic acid, ethyl ester, action of sodium and methyl iodide on (PERKIN and THORPE), P., **1900**, 152.

αα-Dimethyl-α$_1$-*iso*butylsuccinic acid, and its α'-cyano-derivative (LAWRENCE), P., **1900**, 155.
preparation and dissociation constant of (BONE and SPRANKLING), T., 1304; P., **1900**, 184.

Dimethyldiacetylacetone (COLLIE and STEELE), T., 961; P., **1900**, 146.

***s*-3:6-Dimethyldihydro-1:2:4:5-tetrazine** and the action of heat and of benzoic chloride on (SILBERRAD), T., 1185; P., **1900**, 169.

αα-Dimethyl-α$_1$-ethylsuccinic acid, preparation and dissociation constant of (BONE and SPRANKLING), T., 1305; P., **1900**, 184.

Dimethylethylsulphine iodide mercuric iodide (SMILES), T., 162, 167; P., **1899**, 240.

αα'-Dimethylglutaric acids (*pentanedicarboxylic acids*) (THORPE), T., 933; (HOWLES, THORPE, UDALL, and NEALE), T., 948; P., **1900**, 116.

ββ-Dimethylglutaric acid (*pentanedicarboxylic acid*), **αα'-*di*bromo-**, ethyl ester, condensation of, with ethyl sodiomalonate (PERKIN, THORPE, and WALKER), P., **1900**, 149.

Dimethyl*cyclo*hexanecarboxylic acid (*hexahydroxylic acid*) and its isomeride (LEES and PERKIN), P., **1900**, 20.

Dimethyl-α- and -β-naphthylamines and the action of formaldehyde on (MORGAN), T., 822; P., **1900**, 131.

αα-Dimethyl-α$_1$-*n*- and -*iso*-propylsuccinic acids, preparation and dissociation constant of (BONE and SPRANKLING), T., 1305; P., **1900**, 184.

2:5-Dimethylpyrazine, absorption spectrum of (HARTLEY and DOBBIE), T., 846; P., **1900**, 129.

Dimethylpyrone, action of sodium ethoxide on (COLLIE and STEELE), T., 970; P., **1900**, 146.
action of iodine on the barium and sodium salts of, and its periodide (COLLIE and STEELE), T., 1114; P., **1900**, 164.

***as*-Dimethylsuccinic acid** and anhydride (PERKIN, THORPE, and WALKER), P., **1900**, 149.

αα-Dimethylsuccinic acids, preparation and dissociation constants of (BONE and SPRANKLING), T., 1204; P., **1900**, 184.

3:5-Dimethyl-1:2:4-triazole, synthesis of, and its hydrochloride and nitrate (SILBERRAD), T., 1187; P., **1900**, 169.

Dimorphism of cyanocamphor and its chloro- and bromo-derivatives (LAPWORTH), T., 1059; P., **1900**, 128.

Diphenacetyltartaric acid, diethyl ester, rotation of (MCCRAE and PATTERSON), T., 1096; P., **1900**, 161.

***as*-Diphenoxysuccinic acid**, ethyl ester (RUHEMANN and BEDDOW), T., 1121; (RUHEMANN and STAPLETON), T., 1183; P., **1900**, 168.

Diphenyldiazoxole, preparation and isolation of (SILBERRAD), T., 1188; P., **1900**, 169.

***s*-3:6-Diphenyldihydrotetrazine** (SILBERRAD), T., 1188; P., **1900**, 169.

Diphenylethylenediamine, its nitro-derivatives, nitrate and mercurichloride (MILLS), T., 1020; P., **1900**, 127.

***i*-Diphenylethylenediamine** (m. p. 120-121°), action of nitrous acid on (JAPP and MOIR), T., 642.

Diphenylpyrimidone (RUHEMANN and STAPLETON), T., 239; P., **1900**, 11.

Diphenylsuccinic acid, *di*thio-, ethyl ester (RUHEMANN and STAPLETON), T., 1183; P., **1900**, 168.

3:5-Diphenyl-1:2:4-triazole, preparation and isolation of (SILBERRAD), T., 1188; P., **1900**, 169.

Di*iso*propyl. See Hexane.

***s*-Di-*n*- and -*iso*-propylsuccinic acids**, *cis*- and *trans*- (*octanedicarboxylic acids*), preparation and properties of (BONE and SPRANKLING), T., 654; P., **1900**, 71.

Dissociation constants of alkyl-substituted succinic acids (BONE and SPRANKLING), T., 667, 1298; P., **1900**, 72, 184.
of normal saturated dibasic acids (WALKER), T., 397.
of azoimide (WEST), T., 705; P., **1900**, 74.
of campholytic and *iso*lauronolic acids (WALKER), T., 399.
of camphoric acid and its derivatives (WALKER), T., 396; P., **1900**, 61.
of carbon dioxide (WALKER and CORMACK), T., 8; P., **1899**, 208.
of dehydracetic acid (WALKER), T., 971; P., **1900**, 147.
of hydrocyanic acid (WALKER and CORMACK), T., 15; P., **1899**, 208.

Di-*o*-, -*m*-, and -*p*-tolylethylenediamines, their nitro-derivatives, nitrates, and mercurichlorides (MILLS), T., 1020; P., **1900**, 127.

E.

Elaidic acid, formation of, and action of dilute nitric acid on (EDMED), P., **1899**, 190.

Electrical conductivity of acids, apparatus for measuring the (WALKER and CORMACK), T., 5; P., **1899**, 208.

of azoimide (WEST), T., 707; P., **1900**, 74.

Electrolysis of the nitrogen hydrides and of hydroxylamine (SZARVASY), T., 603; P., **1900**, 3.

of fused mixtures of aniline and its hydrochloride (SZARVASY), T., 208; P., **1899**, 194.

Electrolytic dissociation of very weak inorganic acids (WALKER and CORMACK), T., 5; P., **1899**, 208.

preparation of induline dyes (SZARVASY), T., 207; P., **1899**, 194.

Ellagic acid from various tannin matters (PERKIN), T., 423.

Equilibrium between hydrogen peroxide and persulphuric acid (LOWRY and WEST), T., 955; P., **1900**, 127.

Ethanedicarboxylic acids. See:—
Methylmalonic acid.
Succinic acid.

Ethenyl*tri*aminonaphthalene and its isomeride and their salts, and acyl-, methyl-, and phenylazo-derivatives (MELDOLA and EYNON), T., 1159; P., **1900**, 166.

Etherification, inhibiting effect of, on substitution in phenols (ARMSTRONG and LEWIS), P., **1900**, 157.

of β-naphthol derivatives (DAVIS), T., 33; P., **1899**, 210.

Ethers, formation of, by means of dry silver oxide and alkyl haloids (LANDER), T., 729; P., **1900**, 6, 90.

Ethoxycaronic acid and anhydride (PERKIN, THORPE, and WALKER), P., **1900**, 149.

2-Ethoxypyridine, 3:5:6:4-*tri*chloroamino- (SELL and DOOTSON), T., 4.

Ethyl iodide, action of, on mercurous nitrite (RÂY), P., **1899**, 239.

Ethylacetoacetic acid, ethyl ester, action of dry silver oxide and ethyl iodide on (LANDER), T., 741; P., **1900**, 6.

Ethylbenzene (*phenylethane*) refraction and magnetic rotation of (PERKIN), T., 267; P., **1899**, 237.

Ethyldiacetylacetone (?) (COLLIE and STEELE), T., 970; P., **1900**, 146.

Ethyl-β-naphthylamine, action of benzaldehyde on (MORGAN), T., 1210; P., **1900**, 171.

hydrochloride, action of formaldehyde on (MORGAN), T., 828; P., **1900**, 131.

Ethyl*iso*propylacetic acid. See Heptoic acid.

Ethyl*iso*propylmalonic acid and its ethyl ester (CROSSLEY and LE SUEUR), T., 83; P., **1899**, 225.

F.

Ferrous cyanide, constitution of (BROWNING), T., 1236; P., **1900**, 172.

Fluorescein, nitro-derivatives, preparation and constitution of (HEWITT and PERKINS), T., 1324; P., **1900**, 178.

Fluorescence and chemical constitution (HEWITT and PERKINS), T., 1324; P., **1900**, 178; (HEWITT), P., **1900**, 3.

Formaldehyde, formation of (FENTON), T., 1297; P., **1900**, 148.

condensation of, with ethyl malonate (BOTTOMLEY and PERKIN), T., 294; P., **1900**, 16.

action of, on amines of the naphthalene series (MORGAN), T., 814; P., **1900**, 131.

Formylanilide, *o*-bromo- and -chloro-, nitrogen bromides and chlorides from (CHATTAWAY and ORTON), T., 800.

Fumaric acid, chloro-, ethyl ester, condensation of, with benzamidine and guanidine (RUHEMANN and STAPLETON), T., 808; P., **1900**, 122.

action of sodium phenoxide on (RUHEMANN and BEDDOW), T., 1123; P., **1900**, 165.

Furfuraldehyde, estimation of (CORMACK), T., 990; P., **1900**, 156.

Furfurine, an isomeride of (MILLINGTON and HIBBERT), P., **1900**, 161.

G.

Galactose, oxidation of, by hydrogen peroxide (MORRELL and CROFTS), T., 1219.

Gas, liquefaction of a, by "self-cooling" (NEWTH), P., **1900**, 87.

Genistein and its methyl and ethyl ethers and their acetyl derivatives and decomposition products (PERKIN and HORSFALL), T., 1310; P., **1900**, 182.

d-**Glucose.** See Dextrose.
Glucosides from parsley (PERKIN), T., 416; P., **1900**, 44.
Glutaric acid (n-*pyrotartaric acid; propanedicarboxylic acid*), formation of (BOTTOMLEY and PERKIN), T., 300; P., **1900**, 16.
bromo-, ethyl ester, action of alcoholic potash on (BOWTELL and PERKIN), P., **1899**, 241.
Glyceric acid, oxidation of, in presence of ferrous salts (FENTON and JONES), T., 72; P., **1899**, 224.
Glycollic acid, oxidation of, in presence of ferrous salts (FENTON and JONES), T., 70; P., **1899**, 224.
Glycollic aldehyde, formation of α- and β-acrose from (JACKSON), T., 129; P., **1899**, 238.
degradation of (FENTON), T., 1294; P., **1900**, 148.
Glycollic aldoxime (FENTON), T., 1296; P., **1900**, 148.
Glycollonitrile, acetyl derivative, preparation of, and action of ammoniacal silver oxide on (FENTON), T., 1297; P., **1900**, 148.
Glyoxaline-red, formation of (RUHEMANN and STAPLETON), T., 809; P., **1900**, 122.
Gramineæ, presence of invertase in some plants of the (O'SULLIVAN), T., 691; P., **1900**, 61.
Guaiacol, condensation of, with ethyl phenylpropiolate (RUHEMANN and STAPLETON), T., 1180; P., **1900**, 168.
Guanidine, condensation of, with the ethyl esters of acetylenedicarboxylic and chlorofumaric acids (RUHEMANN and STAPLETON), T., 805; P., **1900**, 122.
action of, on ethyl phenylpropiolate (RUHEMANN and STAPLETON), T., 242; P., **1900**, 12.

H.

Hæmatoporphyrin, action of bromine on (MARCHLEWSKI and SCHUNCK), T., 1091; P., **1900**, 149.
Hæmatoxylin (GILBODY and PERKIN), P., **1899**, 241.
constitution of (PERKIN and YATES), P., **1900**, 108.
Hæmatoxylon campechianum, constituents of (PERKIN), T., 426; P., **1900**, 45.
Halogens, specific gravity of the, at their boiling points (DRUGMAN and RAMSAY), T., 1228; P., **1900**, 172.
Heptanedicarboxylic acids. See:—
Methyl*iso*propylglutaric acids.
Tetramethylglutaric acids.
Heptoic acid (α-iso*propylbutyric acid, ethyl*isopropylacetic *acid*) and its derivatives, preparation of (CROSSLEY and LE SUEUR), T., 89; P., **1899**, 225.
its ethyl ester, amide, anilide, and toluidide (CROSSLEY and LE SUEUR), T., 93; P., **1899**, 225.
α-bromo-, ethyl ester, action of diethylaniline on (CROSSLEY and LE SUEUR), T., 95; P., **1899**, 225.
Heptoic acid (*αββ-trimethylbutyric acid*) γ-cyano-, ethyl ester (THORPE and YOUNG), T., 939; P., **1900**, 115.
Hexahydro-xylic acid. See Dimethyl-*cyclo*hexanecarboxylic acid.
Hexamethylene. See *cyclo*Hexane.
Hexane (*diisopropyl*), preparation, vapour pressures, specific volumes, and critical constants of (YOUNG and FORTEY), T., 1126; P., **1900**, 165.
*cyclo***Hexane** (*hexamethylene*), spectrum of (HARTLEY and DOBBIE), T., 846; P., **1900**, 129.
and *mono-* and *di*-chloro-, refraction and magnetic rotation of (YOUNG and FORTEY), T., 372; P., **1900**, 44.
Hexanedicarboxylic acids. See:—
Dimethylethylsuccinic acid.
β-*iso*Propylglutaric acid.
Trimethylglutaric acid.
Hexanetricarboxylic acid. See Dimethylbutanetricarboxylic acid.
*cyclo***Hexene** (*tetrahydrobenzene*), spectrum of (HARTLEY and DOBBIE), T., 846; P., **1900**, 129.
Hexenoic acid (β-iso*propylacrylic acid*), ethyl ester, condensation of, with ethyl sodiocyanoacetate (HOWLES, THORPE, and UDALL), T., 943; P., **1900**, 115.
Homocamphanic acid, formation of (LAPWORTH), T., 1066; P., **1900**, 128.
α-**Homocamphoramic acid**, formation of (LAPWORTH), T., 1061; P., **1900**, 128.
Homocamphoric acid and its bromination (LAPWORTH), T., 1053; P., **1900**, 128.
α-bromo-, and its diethyl ester, action of bases on (LAPWORTH), T., 1066; P., **1900**, 129.
Homocamphoric dianilide (LAPWORTH), T., 1063.
Homocamphoronic acid (LAPWORTH and CHAPMAN), T., 309; P., **1900**, 4.
bromination of (LAPWORTH and CHAPMAN), T., 452; P., **1900**, 56.

Hydrazine, electrolysis of (SZARVASY), T., 605; P., **1900**, 3.
Hydrazinosalicylic acid (AUDEN), P., **1899**, 231.
Hydrazoic acid. See Azoimide.
Hydrazone-compounds differentiated from azo-compounds by bromine (ARMSTRONG), P., **1899**, 243.
Hydrindamine chloro- and **bromo-camphorsulphonates** and *cis*-**π-camphanates**, isomeric (KIPPING), T., 861; P., **1900**, 51.
Hydrobromic acid (*hydrogen bromide*), preparation of pure (SCOTT), T., 648; P., **1900**, 69.
Hydrocyanic acid (*hydrogen cyanide*), preparation of (BROWNING), T., 1235; P., **1900**, 172.
constitution of (WADE), P., **1900**, 156.
dissociation constant of (WALKER and CORMACK), T., 15; P., **1899**, 208.
Hydroferrocyanic acid, constitution of, decomposition of, in air, action of heat and of ether on (BROWNING), T., 1233; P., **1900**, 172.
decomposition of (ADIE and BROWNING), T., 157; P., **1899**, 226.
Hydrogen bromide. See Hydrobromic acid.
cyanide. See Hydrocyanic acid.
nitride. See Azoimide.
Hydrogen *per*oxide, equilibrium between persulphuric acid and (LOWRY and WEST), T., 955; P., **1900**, 127.
action of, on carbohydrates, in presence of ferrous salts (MORRELL and CROFTS), T., 1219; P., **1900**, 171.
interaction of, with sulphuric acid (LOWRY and WEST), T., 950; P., **1900**, 126.
Hydrogen *tetr*oxide, Bach's (ARMSTRONG), P., **1900**, 134.
Hydrogen sulphide, dissociation constant of (WALKER and CORMACK), T., 14; P., **1899**, 208.
estimation of (RUSSELL), T., 354; P., **1900**, 41.
Hydroxyamidosulphates, decomposition of, by copper sulphate (DIVERS and HAGA), T., 978; P., **1900**, 147.
o-**Hydroxybenzoic acid.** See Salicylic acid.
Hydroxybenzylidene-2-naphthylamine, 1-bromo- and 1-chloro-*o*- and -*p*-, and their hydrocyanides (MORGAN), T., 1216; P., **1900**, 171.
α-Hydroxycamphopyric acid (GARDNER), P., **1900**, 46.
α-Hydroxyhomocamphoric acid, lactone of. See Homocamphanic acid.
Hydroxylamine, spectrum of (HARTLEY and DOBBIE), T., 321; P., **1900**, 14.
electrolysis of (SZARVASY), T., 608; P., **1900**, 3.
action of, on ethyl phenylpropiolate (RUHEMANN and STAPLETON), T., 240; P., **1900**, 11.
hydrochloride, gradual decomposition of, when impure (DIVERS and HAGA), T., 978; P., **1900**, 147.
1-Hydroxylaminocamphane (*β-bornylhydroxylamine*) (FORSTER), T., 255; P., **1900**, 14.
Hydroxymethylquinoxaline (RUHEMANN and STAPLETON), T., 249; P., **1900**, 12.
2-Hydroxy*iso***nicotinic acid**, 6-chloro-, and 6-amino- (SELL and DOOTSON), T., 236; P., **1900**, 9.
o-**Hydroxyphenoxyacetic acid.** See Catecholacetic acid.
m-**Hydroxyphenoxyacetic acid** (*resorcinolacetic acid*), and its silver salt and anilide (CARTER and LAWRENCE), T., 1222; P., **1900**, 152.
p-**Hydroxyphenoxyacetic acid** (*quinolacetic acid*) and its aniline salt and anilide (CARTER and LAWRENCE), T., 1222; P., **1900**, 152.
α-Hydroxypropionic acid. See Lactic acid.
2-Hydroxypyridine, 3:4:5:6-*tetra*chloro- (SELL and DOOTSON), T., 772.
Hydroxypyrimidinecarboxylic acid, amino-, ethyl ester of (RUHEMANN and STAPLETON), T., 808; P., **1900**, 122.
Hypobromous acid, action of, on anilides (CHATTAWAY and ORTON), T., 789, 797; P., **1900**, 102, 112; (ARMSTRONG), T., 1047; P., **1900**, 160.
action of, on diacetyl-*m*-phenylenediamine (MORGAN), T., 1203; P., **1900**, 170.
Hypochlorous acid, action of, on anilides (CHATTAWAY and ORTON), T., 134, 789, 797; P., **1899**, 232; P., **1900**, 102, 112; (CHATTAWAY, ORTON, and HURTLEY), T., 800; P., **1900**, 125; (ARMSTRONG), T., 1047; P., **1900**, 160.
action of, on diacetyl- and dibenzoyl-*m*-phenylenediamine (MORGAN), T., 1203; P., **1900**, 170.

I.

Imidosulphites (DIVERS and OGAWA), P., **1900**, 113.

Indene, new syntheses of (KIPPING and HALL), T., 467; P., **1900**, 54.
Induline dyes, electrolytic preparation of (SZARVASY), T., 207; P., **1899**, 194.
Invertase, presence of, in some plants of the Gramineæ (O'SULLIVAN), T., 691; P., **1900**, 61.
Iodates and hypoiodites, estimation of (ORTON and BLACKMAN), T., 830; P., **1900**, 103.
Iodine atom, configuration of the (KIPPING and PETERS), P., **1900**, 62.
action of, on alkalis (TAYLOR), T., 725; P., **1900**, 70.
behaviour of, with mercuric oxide (ORTON and BLACKMAN), T., 835; P., **1900**, 104.
Iodine *mono*chloride, reaction of, with alkalis (ORTON and BLACKMAN), T., 830; P., **1900**, 103.

J.

Jaborandi leaves, alkaloids of (JOWETT), T., 473; P., **1900**, 49.
Jaborine (JOWETT), T., 473; P., **1900**, 50.
Japaconine, preparation, composition, properties and salts of (DUNSTAN and READ), T., 58; P., **1899**, 207.
Japaconitine, extraction, composition, properties, hydrolysis, salts, and physiological action of (DUNSTAN and READ), T., 47; P., **1899**, 206.
Japbenzaconine, preparation, properties, hydrolysis and salts of (DUNSTAN and READ), T., 55; P., **1899**, 207.

L.

Lactic acid (i-*ethylidenelactic acid*, *α-hydroxypropionic acid*), oxidation of, in presence of ferrous salts (FENTON and JONES), T., 71; P., **1899**, 224.
Lactone, $C_{10}H_{16}O_2$, from the bromination of homocamphoric acid (LAPWORTH), T., 1063; P., **1900**, 128.
Lævulomannan from *Phytelephas macrocarpa*, and its dibenzoyl derivative (BAKER and POPE), T., 696; P., **1900**, 72.
*iso***Lauronolic acid** (LEES and PERKIN), P., **1900**, 18.
and its stereoisomeride, reactions and structure of (WALKER and CORMACK), T., 374; P., **1900**, 58.
Lead chlorate, decomposition of (SODEAU), T., 717; P., **1900**, 88.
Liquefaction of a gas by "self-cooling" (NEWTH), P., **1900**, 87.
Luteolin, constitution and dimethyl ether of (PERKIN), P., **1899**, 242.
and its methyl ethers, decomposition products and salts of (PERKIN and HORSFALL), T., 1314; P., **1900**, 181.

M.

Magnesium potassium and magnesium rubidium sulphates (MALLET), T., 219, 223; P., **1899**, 227.
Magnetic rotation. See Photochemistry.
Malic acid, oxidation of, in presence of ferrous salts (FENTON and JONES), T., 75; P., **1899**, 224.
Malonamide, action of nitrosyl chloride on, and of hydroxylamine on its dibromo-derivative (WHITELEY), T., 1040; P., **1900**, 145.
Malonic acid, ethyl ester, condensation of, with formaldehyde (BOTTOMLEY and PERKIN), T., 294; P., **1900**, 16.
condensation of the sodium derivative of, with ethyl *αα'*-dibromo-*ββ*-dimethylglutarate (PERKIN, THORPE, and WALKER), P., **1900**, 149.
action of dry silver oxide and ethyl iodide on (LANDER), T., 743; P., **1900**, 6, 90.
Manganese potassium sulphate (MALLET), T., 221; P., **1899**, 227.
Mannogalactan from *Strychnos potatorum* and its dibenzoyl derivative (BAKER and POPE), T., 696; P., **1900**, 72.
Manures estimation of potash in (ADIE and WOOD), T., 1079; P., **1900**, 17.
Memorial lectures: Victor Meyer (THORPE), T., 169; P., **1900**, 33; Bunsen (ROSCOE), T., 513; P., **1900**, 84; Friedel (CRAFTS), T., 993; Nilson (PETTERSSON), T., 1277.
l-**Menthol**, action of dry silver oxide and ethyl iodide on (LANDER), T., 731; P., **1900**, 6.
Mercury, vapour density of (BAKER), T., 648; P., **1900**, 68.
Mercuric iodide, action of, on alkyl sulphides (SMILES), T., 163; P., **1899**, 240.
oxide, action of iodine on (ORTON and BLACKMAN), T., 835; P., **1900**, 104.
Mercurous chloride, vapour density of dried (BAKER), T., 646; P., **1900**, 68.
iodide (RÂY), P., **1899**, 239.
nitrite, action of, on ethyl iodide (RÂY), P., **1899**, 239.

Mesitylene (1:3:5-*trimethylbenzene*), refraction and magnetic rotation of (PERKIN), T., 267; P., **1899**, 237.

Mesityl oxide (*methyl* iso*butenyl ketone*; iso*propylideneacetone*), condensation of, with ethyl sodiomethylmalonate (CROSSLEY), P., **1900**, 90.

Mesoxamide, oxime of, and its salts and acetyl and ethyl derivatives, and the action of nitrous acid on (WHITELEY), T., 1040; P., **1900**, 145.

Metahemipinic acid (GILBODY and PERKIN), P., **1899**, 241; (GILBODY, PERKIN, and YATES; PERKIN and YATES), P., **1900**, 107.

Metal-ammonia compounds, nature of, in aqueous solution (DAWSON and MCCRAE), T., 1239; P., **1900**, 172.

Methane, nitro-, action of alkalis and ammonia on (DUNSTAN and GOULDING), T., 1262; P., **1900**, 174.

Methazonic acid, preparation, constitution and reactions of (DUNSTAN and GOULDING), T., 1264; P., **1900**, 174.

p-**Methoxybenzylidene-2-naphthylamine**, 1-bromo- and 1-chloro-, and their hydrocyanides (MORGAN), T., 1216; P., **1900**, 171.

β-o-**Methoxyphenoxycinnamic acid** and its ethyl ester (RUHEMANN and STAPLETON), T., 1180; P., **1900**, 168.

o-**Methoxyphenoxystyrene** (RUHEMANN and STAPLETON), T., 1181; P., **1900**, 168.

Methylacrylic acids, *α*- and *β*-, ethyl esters, condensation of, with ethyl sodiocyanoacetate (HOWLES, THORPE, UDALL, and NEALE), T., 947; P., **1900**, 115.

Methylamine, spectrum of (HARTLEY and DOBBIE), T., 320; P., **1900**, 14.
action of iodine chloride on (ORTON and BLACKMAN), T., 833; P., **1900**, 103.

$\alpha\alpha_1$-**Methyl***iso***amylsuccinic acid** and its oxidation products (LAWRENCE), P., **1900**, 156.

$\alpha\alpha_1$-**Methyl***iso***amylsuccinic acids**, *cis*- and *trans*-, dissociation constants of (BONE and SPRANKLING), T., 1304; P., **1900**, 184.

Methyl *iso***butenyl ketone**. See Mesityl oxide.

α-**Methyl-**α_1-*iso***butylglutaric acid**, and its oxidation, and α_1-cyano-derivative (LAWRENCE), P., **1900**, 155.

Methyl*iso***butylglutaric acids**, *cis*- and *trans*-, and their anhydrides and anilic acids (LAWRENCE), P., **1900**, 154.

α-**Methyl-**α_1-*iso***butylpropanetricarboxylic acid**, and its ethyl ester (LAWRENCE), P., **1900**, 154.

$\alpha\alpha_1$-**Methyl***iso***butylsuccinic acids**, *cis*- and *trans*-, preparation and dissociation constants of (BONE and SPRANKLING), T., 1303; P., **1900**, 184.

Methylbutyric acid. See Valeric acid.

Methylcarboxyresorcylacetic acid (GILBODY, PERKIN, and YATES), P., **1900**, 106.

Methylcyanoacetic acid, ethyl ester, constitution of the sodium derivative of (THORPE), T., 923; P., **1900**, 113.

Methyldiethylsulphine iodide mercuric iodide (SMILES), T., 162; P., **1899**, 240.

Methylenebis-1-bromo- and **-1-chloro-2-naphthylamine** (MORGAN), T., 814; P., **1900**, 131.

m- and *p*-**Methylenemalonic acids**, ethyl esters, preparation and distillation of (BOTTOMLEY and PERKIN), T., 306; P., **1900**, 16.

Methylenemalonic and *p*-**Methylenemalonic acids**, ethyl esters, hydrolysis of (BOTTOMLEY and PERKIN), T., 306; P., **1900**, 16.

Methyl ethyl sulphide-mercuric iodide (SMILES), T., 164; P., **1899**, 240.

Methylethyldesylsulphine bromide and picrate (SMILES), T., 1175; P., **1900**, 168.

d- and *l*-**Methylethylphenacylsulphine** *d*-bromocamphorsulphonates and picrates (SMILES), T., 1175; P., **1900**, 168.

i-**Methylethylphenacylsulphine** bromide and picrate (SMILES), T., 1175; P., **1900**, 168.

d-**Methylethyl-***n***-propyl** tin iodide (POPE and PEACHEY), P., **1900**, 42.
d-bromocamphorsulphonate (POPE and PEACHEY), P., **1900**, 116.

Methylethylthetine, attempts to resolve (SMILES), T., 168; P., **1899**, 240.
resolution of, into active components (POPE and PEACHEY), T., 1072; P., **1900**, 12.

d-**Methylethylthetine** platinichloride, *d*-camphorsulphonate, and *d*-bromocamphorsulphonate (POPE and PEACHEY), T., 1072; P., **1900**, 12.

Methylglutaric acids, *α*- and *β*- (*butanedicarboxylic acids*) (HOWLES, THORPE, and UDALL), T., 947; P., **1900**, 116.

Methylglyoxal-*p***-ethoxyphenyl-hydrazoxime, -osazone** and **-osotetrazone** (AUDEN), P., **1899**, 230.

Methylglyoxal-methylphenylphenylosazone and **-salicylic acid osazone** (AUDEN), P., **1899**, 231.

Methyljapaconitine and its aurichloride (DUNSTAN and READ), T., 54; P., **1899**, 207.

Methylmalonic acid (iso*succinic acid; ethanedicarboxylic acid*), sodium derivative of the ethyl ester, condensation of, with mesityl oxide (CROSSLEY), P., **1900**, 90.

Methyl*iso*pilocarpine and its salts (JOWETT), T., 853; P., **1900**, 125.

1:4-Methyl*iso*propylbenzene. See Cymene.

α-**Methyl**-*β*-*iso***propylglutaric acids** (*heptanedicarboxylic acids*) (HOWLES, THORPE, and UDALL), T., 946; P., **1900**, 115.

αα$_1$-**Methylpropylsuccinic acids**, *cis*- and *trans*-, preparation and dissociation constants of (BONE and SPRANKLING), T., 1302; P., **1900**, 184.

Methylresorcinolacetic acid (GILBODY, PERKIN, and YATES), P., **1900**, 106.

Mixtures, refraction of (PERKIN), T., 280; P., **1899**, 237.

Morphide, chloro-, and bromo-, and their hydrochlorides and hydrobromides (SCHRYVER and LEES), T., 1024; P., **1900**, 143.

*iso***Morphine** and its hydrochloride, hydrobromide and methiodide (SCHRYVER and LEES), T., 1024; P., **1900**, 143.

methiodide, action of silver sulphate and barium hydroxide on (SCHRYVER and LEES), T., 1024; P., **1900**, 143.

Mucic acid, oxidation of, in presence of ferrous salts (FENTON and JONES), T., 76; P., **1899**, 224.

Myrica Gale, constituents of (PERKIN), T., 429; P., **1900**, 45.

Myricetin from various tannin matters (PERKIN), T., 423; P., **1900**, 45.

N.

Naphthalene, vapour pressure of (ALLEN), T., 400; P., **1899**, 122.

β-**Naphthalenecarboxylic acid**, ethyl ester, chloroimide of (STIEGLITZ and SLOSSON), P., **1900**, 2.

β-**Naphthol** derivatives, etherification of (DAVIS), T., 33; P., **1899**, 210.

Naphthols, *α*- and *β*-, condensation of, with ethyl phenylpropiolate (RUHEMANN and BEDDOW), T., 984; P., **1900**, 123.

β-**Naphthoxycinnamic acids**, *α*- and *β*- (RUHEMANN and BEDDOW), T., 984; P., **1900**, 123.

β-**Naphthyl methyl, ethyl, and propyl ethers** and their halogen derivatives (DAVIS), T., 36; P., **1899**, 210.

β-**Naphthylamine** derivatives, action of aromatic aldehydes on (MORGAN), T., 1210; P., **1900**, 171.

Naphthylamines, action of formaldehyde on (MORGAN), T., 814; P., **1900**, 131.

Nascent state, influence of, on the combination of oxygen and carbon monoxide (RUSSELL), T., 361; P., **1900**, 42.

Neobornylamine, separation of, from bornylamine, rotatory power of, and action of ethyl oxalate on (FORSTER and HART-SMITH), T., 1152; P., **1900**, 166.

Nickel sulphate, combination of, with ammonia in aqueous solution (DAWSON and MCCRAE), T., 1247; P., **1900**, 173.

potassium sulphate (MALLET), T., 221; P., **1899**, 227.

*iso***Nicotinic acid** (*4-pyridinecarboxylic acid*), 2:6-*di*iodo- (SELL and DOOTSON), T., 235; P., **1900**, 9.

Nitrification, recent researches on (WARINGTON), P., **1900**, 65.

Nitritohydroximidosulphates (DIVERS and HAGA), T., 432; P., **1900**, 54.

Nitrogen, atomic weight of (DEAN), T., 117; P., **1899**, 213.

quinquevalent, isomeric partially racemic salts containing (KIPPING), T., 861; P., **1900**, 51.

specific gravity of, at its boiling point (DRUGMAN and RAMSAY), T., 1228; P., **1900**, 172.

Nitrogen bromides and chlorides, substituted (ARMSTRONG), T., 1047; P., **1900**, 160; (STIEGLITZ and SLOSSON), P., **1900**, 2; discussion, P., 2.

method of transforming (CHATTAWAY and ORTON), T., 796.

from *o*- and *p*-acetotoluidides (CHATTAWAY and ORTON), T., 789; P., **1900**, 102.

ortho-substituted, and their transformation (CHATTAWAY and ORTON), T., 797; P., **1900**, 112.

Nitrogen chlorides, substituted (CHATTAWAY and ORTON), T., 134; P., **1899**, 232.

from *m*-chloroacetanilide (CHATTAWAY, ORTON, and HURTLEY), T., 800; P., **1900**, 125.

Nitrous acid, sulphonation of, by sulphurous acid (DIVERS and HAGA), T., 688; P., **1900**, 70.

Nitrites, interaction between sulphites and (DIVERS and HAGA), T., 673; P., **1900**, 70.

Nitro-group, elimination of a, during diazotisation (MELDOLA and WECHSLER), T., 1172; P., **1900**, 167.

specific gravity of, at its boiling point (DRUGMAN and RAMSAY), T., 1228; P., **1900**, 172.
influence of the nascent state on the combination of carbon monoxide and (RUSSELL), T., 361; P., **1900**, 42.
combination of, with sulphur dioxide (RUSSELL and SMITH), T., 340; P., **1900**, 41.

P.

Paraffins, nitro-, action of alkalis on, and reduction of, and of their salts (DUNSTAN and GOULDING), T., 1266; P., **1900**, 175.

Pentamethylene (cyclo*pentane*) derivatives, new series of (PERKIN, THORPE, and WALKER), P., **1900**, 149.

Pentamethylenehexacarboxylic acid (BOTTOMLEY and PERKIN), T., 294; P., **1900**, 16.

Pentamethylene-1:2:4-tricarboxylic acids, *cis-* and *trans-*, synthesis of (BOTTOMLEY and PERKIN), T., 296; P., **1900**, 16.

Pentanehexacarboxylic acid, ethyl ester (BOTTOMLEY and PERKIN), T., 294; P., **1900**, 16.

Pentanetricarboxylic acid and its decomposition (BOTTOMLEY and PERKIN), T., 294; P., **1900**, 16.

Phenacetyltartaric acid, diethyl ester, rotation of (MCCRAE and PATTERSON), T., 1096; P., **1900**, 161.

Phenol, dissociation constant of (WALKER and CORMACK), T., 18; P., **1899**, 208.
condensation of, with ethyl phenylpropiolate (RUHEMANN and BEDDOW), T., 984; P., **1900**, 123.
thio-. See Phenyl mercaptan.

Phenols, action of, on ethyl acetylenedicarboxylate (RUHEMANN and BEDDOW), T., 1119; P., **1900**, 165.
action of, on ethyl phenylpropiolate (RUHEMANN and BEDDOW), T., 984, 1119; P., **1900**, 123, 165.

Phenolazobenzeneazophenol and its diacetyl derivative (MELDOLA and WILLIAMS), P., **1899**, 196.

β-Phenoxycinnamic acid and its ethyl ester (RUHEMANN and BEDDOW), T., 984; P., **1900**, 123.

β-Phenoxycinnamic acid, ethyl ester, action of sulphuric acid on (RUHEMANN and STAPLETON), T., 1183; P., **1900**, 168.

Phenoxyfumaric acid and its ethyl ester and amide (RUHEMANN and BEDDOW), T., 1119; P., **1900**, 165.

action of sulphuric acid on (RUHEMANN and STAPLETON), T., 1180; P., **1900**, 168.

Phenoxymaleic acid (RUHEMANN and BEDDOW), T., 1119; P., **1900**, 165.

Phenoxystyrene (RUHEMANN and BEDDOW), T., 984; P., **1900**, 123.

Phenyl acetyl nitrogen chlorides, chloro-derivatives of (*acetylchloroaminochlorobenzenes*) (CHATTAWAY, ORTON, and HURTLEY), T., 800; P., **1900**, 125.

Phenyl acetyl nitrogen chlorides and **bromides** (*acetyl-chloro-* and *-bromoaminobenzenes*) and their transformation (CHATTAWAY and ORTON), T., 798; P., **1900**, 112.

Phenyl acyl nitrogen chlorides, *p-mono-* and 2:4:6-*tri*-chloro- (CHATTAWAY and ORTON), T., 134; P., **1899**, 232.

Phenyl acyl nitrogen chlorides and **bromides**, and their behaviour to alkalis, potassium cyanide, and zinc ethyl (STIEGLITZ and SLOSSON), P., **1900**, 1; discussion, P., 2.

Phenylacetylchloramine, discrepancies in the description of its properties, and explanation of the manner it undergoes isomeric change (ARMSTRONG), T., 1047; P., **1900**, 160.

β-Phenylcinnamic acid, thio-, and its ethyl ester (RUHEMANN and STAPLETON), T., 1181; P., **1900**, 168.

2-Phenyl-4:5-*cis*-diphenyl-4:5-dihydroimidazole. See Amarine.

2-Phenyl-4:5-*trans*-diphenyl-4:5-dihydroimidazole. See *iso*Amarine.

***m*-Phenylenediacetyl-*di*chloro- and *-di*bromo-amine** (MORGAN), T., 1203; P., **1900**, 170.

***m*-Phenylenediamine**, acyl derivatives, action of hypochlorous and hypobromous acids on (MORGAN), T., 1203; P., **1900**, 170.

1-*mono*- and 1:5-*di*-chloro- and -bromo-, and their dibenzoyl and diacetyl derivatives (MORGAN), T., 1202; P., **1900**, 170.

***o*-Phenylenedioxydiacetic acid** and its ethyl ester, metallic and aniline salts, amide, and anilide (CARTER and LAWRENCE), T., 1222; P., **1900**, 152.

***m*-Phenylenedioxydiacetic acid** and its ethyl ester, metallic and aniline salts, amide, and anilide and 2:4:6-*tri*nitro-derivative (CARTER and LAWRENCE), T., 1222; P., **1900**, 152.

***p*-Phenylenedioxydiacetic acid** and its ethyl ester, metallic salts and anilide (CARTER and LAWRENCE), T., 1222; P., **1900**, 152.

Phenylethane. See Ethylbenzene.

Phenylfumaric acid, thio-, and its ethyl ester (RUHEMANN and STAPLETON), T., 1183; P., **1900**, 168.

C-Phenylhydroxytriazole, and *m*-nitro- and acetyl derivatives (YOUNG and WITHAM), T., 224; P., **1900**, 5.

Phenyl mercaptan, condensation of, with ethyl acetylenedicarboxylate and with ethyl phenylpropiolate (RUHEMANN and STAPLETON), T., 1181; P., **1900**, 168.

5-Phenyl*iso*oxazolone (RUHEMANN and STAPLETON), T., 247; P., **1900**, 12.

Phenylpropiolic acid, ethyl ester, action of benzamidine, of hydroxylamine, of thiocarbamide and of guanidine on (RUHEMANN and STAPLETON), T., 239; P., **1900**, 11.

condensation of, with guaiacol and with phenyl mercaptan (RUHEMANN and STAPLETON), T., 1181; P., **1900**, 168.

action of phenols on (RUHEMANN and BEDDOW), T., 984, 1119; P., **1900**, 123, 165.

Phenylstyrene, thio- (RUHEMANN and STAPLETON), T., 1182; P., **1900**, 168.

Phenyl-*p*-tolyliodonium hydroxide, iodide, and bromocamphorsulphonate (KIPPING and PETERS), P., **1900**, 62.

Phloroglucinol from the fusion with alkali of colouring matters from tannins (PERKIN), T., 424; P., **1900**, 45.

PHOTOCHEMISTRY:—

Rotation of *d-* and *l-iso*amarine and their acid tartrates (SNAPE), T., 784; P., **1900**, 118.

of bornylamine salts, bornyloxamide, dibornyloxamide, and neobornylamine (FORSTER and HART-SMITH), T., 1152; P., **1900**, 166.

of camphoroximeacetic acid and its salts (FORSTER and HART-SMITH), T., 1154; P., **1900**, 166.

of hydrindamine bromo- and chlorocamphorsulphonates and *cis*-π-camphanates (KIPPING), T., 884; P., **1900**, 51.

of methylethylphenacylsulphine *d*-bromocamphorsulphonates and picrates (SMILES), T., 1177; P., **1900**, 168.

PHOTOCHEMISTRY :—
Rotation of *d*-methylethylthetine platinichloride, *d*-camphorsulphonate, and *d*-bromocamphorsulphonate (POPE and PEACHEY), T., 1072 ; P., **1900**, 12.
of ψ-nitrocamphane (FORSTER), T., 258 ; P., **1900**, 13.
of pilocarpine, *iso*pilocarpine and pilocarpidine and their salts (JOWETT), T., 480.
of acetyl and phenacetyl derivatives of diethyl *d*-tartrate (MCCRAE and PATTERSON), T., 1096 ; P., **1900**, 161.
Magnetic rotation of the benzenoid hydrocarbons (PERKIN), T., 267 ; P., **1899**, 237.
of hexamethylene and *mono-* and *di*-chlorohexamethylene (PERKIN), T., 372 ; P., **1900**, 44.
Refraction of mixtures (PERKIN), T., 280 ; P., **1899**, 237.
of the benzenoid hydrocarbons (PERKIN), T., 267 ; P., **1899**, 237.
of hexamethylene and *mono-* and *di*-chlorohexamethylene(PERKIN), T., 372 ; P., **1900**, 44.
Spectrographic method, value of, in tautomerism (HARTLEY and DOBBIE), T., 498 ; P., **1900**, 57.
Spectra of ammonia, methylamine, hydroxylamine, acetaldoxime and acetoxime (HARTLEY and DOBBIE), T., 318 ; P., **1900**, 14.
of benz-*anti-* and *-syn*-aldoximes (HARTLEY and DOBBIE), T., 509 ; P., **1900**, 58.
of 2:5-dimethylpyrazine (HARTLEY and DOBBIE), T., 846 ; P., **1900**, 129.
of ethyl dibenzoylsuccinates (HARTLEY and DOBBIE), T., 498 ; P., **1900**, 57.
of hexamethylene and tetrahydrobenzene (HARTLEY and DOBBIE), T., 846 ; P., **1900**, 129.
of *o*-oxycarbanil and its ethers (HARTLEY, DOBBIE, and PALIATSEAS), T., 839 ; P., **1900**, 130.
of chlorophyll and its colouring matters (MARCHLEWSKI and SCHUNCK), T., 1080 ; P., **1900**, 148.
of bromohæmatoporphyrin and bromophylloporphyrin (MARCHLEWSKI and SCHUNCK), T., 1093.
Spectrometer scale reader, improved (PERKIN), T., 201.
Phylloporphyrin, action of bromine on (MARCHLEWSKI and SCHUNCK), T., 1091 ; P., **1900**, 149.
Physiological action of japaconitine (DUNSTAN and READ), T., 53.
of pilocarpine, *iso*pilocarpine, and pilocarpidine (JOWETT), T., **497**.
Picric acid (2:4:6-tri*nitrophenol*), oxidation of, in presence of ferrous salts (FENTON and JONES), T., 76 ; P., **1899**, 224.
Pilocarpidine, constitution, properties and salts of (JOWETT), T., 473 ; P., **1900**, 50.
Pilocarpine and *iso***Pilocarpine**, constitution, properties, reactions, salts and physiological action of (JOWETT), T., 473 ; P., **1900**, 49.
Pilocarpine, constitution of (JOWETT), T., 494, 851 ; P., **1900**, 50, 123.
*iso***Pilocarpine**, oxidation of, with permanganate, and reactions of, with soda lime, fused caustic potash, and methyl iodide (JOWETT), T., 851 ; P., **1900**, 123.
Piluvic acid, $C_3H_4O_3$ (JOWETT), T., 855.
Potassium carbonate, solubility of solutions of, in aqueous ammonia (NEWTH), T., 775 ; P., **1900**, 87.
chlorate, decomposition products of (SODEAU), T., 142 ; P., **1899**, 157.
nitrite, decomposition of, by alcoholic sulphur dioxide (DIVERS and HAGA), T., 437, 687.
and nitrate, mixed, solubility of (DIVERS), P., **1900**, 40.
Dipotassium sodium cobaltinitrite (ADIE and WOOD), T., 1076 ; P., **1900**, 17.
Potassium sulphates, compounds of, with metallic sulphates (MALLET), T., 216 ; P., **1899**, 227.
nitritohydroximidosulphates (DIVERS and HAGA), T., 432 : P., **1900**, 54.
sulphazotised salts, Fremy's, identification and constitution of (DIVERS and HAGA), T., 440 ; P., **1900**, 55.
hydrosulphides, sulphides, and polysulphides (BLOXAM), T., 753 ; P., **1899**, 146.
Potassium organic compounds:—
ferrocyanide, decomposition of, by sulphuric acid (ADIE and BROWNING), T., 150 ; P., **1899**, 226.
Potassium, new method of estimating (ADIE and WOOD), T., 1076 ; P., **1900**, 17.
Propane, nitro-, secondary, action of alkalis on (DUNSTAN and GOULDING), T., 1266 ; P., **1900**, 174.
Propanedicarboxylic acid. See Glutaric acid.
*cyclo***Propanedicarboxylic acid.** See Trimethylenedicarboxylic acid.

n-**Propyl** *iso***cyanide** (WADE), P., **1900**, 157.
β-*iso***Propylacrylic acid.** See Hexenoic acid.
Propylbenzenes, *n*- and *iso*-, refraction and magnetic rotation of (PERKIN), T., 267; P., **1899**, 237.
α-*iso***Propylbutyric acid.** See Heptoic acid.
β-*iso***Propylglutaric acid** (*hexanedicarboxylic acid*) (HOWLES, THORPE, and UDALL), T., 942; P., **1900**, 115.
*iso***Propylideneacetone.** See Mesityl oxide.
αα$_1$-**Propyl***iso***propylsuccinic acids,** *cis*- and *trans*- (*octanedicarboxylic acids*), preparation and properties of (BONE and SPRANKLING), T., 654; P., **1900**, 71.
Protocatechuic acid (3:4-*dihydroxybenzoic acid*), from the fusion with alkalis of certain colouring matters from tannins (PERKIN), T., 424; P., **1900**, 45.
Pyridine, chlorine derivatives of, constitution of (SELL and DOOTSON), T., 1,233; P., **1899**, 205; **1900**, 9.
chloroamino-derivatives of, constitution of (SELL and DOOTSON), T., 4, 233, 771; P., **1899**, 206; **1900**, 9, 111.
Pyridine-4-carboxylic acid. See *iso*-Nicotinic acid.
Pyrojapaconine, preparation, properties and aurichloride of (DUNSTAN and READ), T., 62; P., **1899**, 207.
Pyrojapaconitine, preparation, properties, hydrolysis, and salts of (DUNSTAN and READ), T., 60; P., **1899**, 207.
Pyromucic acid, oxidation of, in presence of ferrous salts (FENTON and JONES), T., 76; P., **1899**, 224.
α-**Pyrone-***α*′-**carboxylic acid** (LAPWORTH), P., **1900**, 132.
n-**Pyrotartaric acid.** See Glutaric acid.
Pyruvamide, oxime of (WHITELEY), T., 1045; P., **1900**, 145.

Q.

Quercetin from various tannin matters (PERKIN), T., 423; P., **1900**, 45.
Quinolacetic acid. See *p*-Hydroxyphenoxyacetic acid.
Quinoxalidoneacetic acid, ethyl ester (RUHEMANN and STAPLETON), T., 243; P., **1900**, 12.

R.

Racemisation occurring during the formation of benzylidene, benzoyl, and acetyl derivatives of *d*-*ac*-tetrahydro-*β*-naphthylamine (POPE and HARVEY), P., **1900**, 74.
of optically active tin compounds (POPE and PEACHEY), P., **1900**, 116.
Rain-water collected at Cirencester, amount of chlorine in (KINCH), T., 1271; P., **1900**, 183.
Refraction. See Photochemistry.
Resorcinolacetic acid. See *m*-Hydroxyphenoxyacetic acid.
Rhamnose, oxidation of, by hydrogen peroxide (MORRELL and CROFTS), T., 1220; P., **1900**, 171.
Rhus Metopium, constituents of (PERKIN), T., 427; P., **1900**, 45.
Robinia Pseudacacia, constituents of (PERKIN), T., 430; P., **1900**, 45.
Rubidium magnesium sulphate (MALLET), T., 223; P., **1899**, 227.

S.

Saccharic acid, oxidation of, in presence of ferrous salts (FENTON and JONES), T., 76; P., **1899**, 224.
Saccharose. See Sucrose.
Salicylic acid, action of dry silver oxide and methyl iodide on (LANDER), T., 745; P., **1900**, 6, 90.
Salinigrin, new glucoside from willow bark (JOWETT), T., 707; P., **1900**, 89.
Saponification, the theory of (LEWKOWITSCH), P., **1899**, 190.
Semicarbazones, decomposition of (KIPPING), P., **1900**, 63.
hydrolysis of (YOUNG and WITHAM), P., **1900**, 73.
Silico-phenylamide, -diphenylimide, and **-triphenylguanidine** (REYNOLDS), T., 836; P., **1900**, 133.
Silver oxide, dry, and alkyl iodides, alkylation by means of (LANDER), T., 736; P., **1900**, 6, 90.
Silver, estimation of, by Volhard's method (ROSE), T., 232; P., **1900**, 5.
Silver bullion, assay of (ROSE), T., 232; P., **1900**, 5.
Sodium cobalt nitrite, and salt of, with potassium (ADIE and WOOD), T., 1076; P., **1900**, 17.
hydroximidosulphate, gradual decomposition of (DIVERS and HAGA), T., 978; P., **1900**, 147.
hydrosulphides, sulphides and polysulphides (BLOXAM), T., 753; P., **1899**, 146.

Sodium sulphite, decomposition of an ice-cold solution of, by carbon dioxide (DIVERS and HAGA), T., 681.
Soils, estimation of potash in (ADIE and WOOD), T., 1079; P., **1900**, 18.
Solubility of potassium carbonate solution in aqueous ammonia, and *vice versâ* (NEWTH), T., 775; P., **1900**, 87.
of mixed potassium nitrite and nitrate (DIVERS), P., **1900**, 40.
Solutions, inorganic, partially miscible (NEWTH), T., 775; P., **1900**, 87.
Specific rotation. See Photochemistry.
Spectrometer scale reader, improved (PERKIN), T., 291.
Spectrum. See Photochemistry.
C-**Styrenylhydroxytriazole** and its acetyl derivatives (YOUNG and WITHAM), T., 230; P., **1900**, 5.
Substance, $N_2H_4S_2O_3$, and its salts, from the decomposition of ammonium amidosulphite (DIVERS), P., **1900**, 104.
$C_8H_6Br_4$, from the action of bromine on camphononic acid (LAPWORTH and CHAPMAN), T., 466; P., **1900**, 57.
$C_{10}H_{14}O_6N_2$, from α-dibromocamphor and nitric acid (LAPWORTH and CHAPMAN), T., 309; P., **1900**, 4.
$C_{17}H_{20}O_5$, from the action of alcoholic potash on acid, $C_{19}H_{18}O_9$ (GILBODY, PERKIN, and YATES), P., **1900**, 107.
$C_{19}H_{18}O_4$, from the action of phenylhydrazine on trimethylbrazilone (GILBODY, PERKIN, and YATES), P., **1900**, 105.
$C_{23}H_{19}ON$, from the action of formaldehyde on ethyl-β-naphthylamine hydrochloride in alcoholic solution (MORGAN), T., 819; P., **1900**, 131.
$C_{45}H_{42}O_2N_2$, from the action of benzaldehyde on ethyl-β-naphthylamine (MORGAN), T., 1210; P., **1900**, 171.
Substitution in phenols, inhibiting effect of etherification on (ARMSTRONG and LEWIS), P., **1900**, 157.
Succinic acid (*ethanedicarboxylic acid*), *di*cyano-, ethyl ester (THORPE and YOUNG), T., 937; P., **1900**, 115.
*iso***Succinic acid.** See Methylmalonic acid.
Succinic acids, alkyl substituted, preparation and dissociation constants of (BONE and SPRANKLING), T., 654, 1298; P., **1900**, 71, 184.
Sucrose (*saccharose, cane sugar*), oxidation of, by hydrogen peroxide (MORRELL and CROFTS), T., 1220; P., **1900**, 171.
Sulphazotised salts, Fremy's (DIVERS and HAGA), T., 440; P., **1900**, 55.
Sulphur, stereochemistry of (SMILES), T., 160, 1174; P., **1899**, 240; **1900**, 168; (POPE and PEACHEY), T., 1072; P., **1900**, 12.
hydride. See Hydrogen sulphide.
*di*oxide, combination of, with oxygen (RUSSELL and SMITH), T., 340; P., **1900**, 41.
action of dry ammonia on (DIVERS and OGAWA), T., 327; P., **1900**, 38; (DIVERS), P., **1900**, 104.
estimation of (RUSSELL), T., 352; P., **1900**, 41.
Sulphur acids:—
Sulphuric acid, interaction of, with hydrogen peroxide (LOWRY and WEST), T., 950; P., **1900**, 126.
action of, on potassium ferrocyanide (ADIE and BROWNING), T., 150; P., **1899**, 226.
separation of, from vanadium (GOYDER), T., 1096.
Sulphites and nitrites, interaction between (DIVERS and HAGA), T., 673; P., **1900**, 70.
Persulphuric acids (LOWRY and WEST), T., 950; P., **1900**, 126.
Sulvanite from South Australia (GOYDER), T., 1094; P., **1900**, 164.

T.

Tannins of *Arctostaphylos Uva-ursi, Hæmatoxylon campechianum, Rhus Metopium, Myrica Gale, Coriaria Myrtifolia,* and *Robinia Pseudacacia* (PERKIN), T., 424; P., **1900**, 45.
d-**Tartaric acid,** diethyl ester, preparation and rotation of acetyl and phenacetyl derivatives of (MCCRAE and PATTERSON), T., 1096; P., 1900, 161.
Tartronic acid, oxidation of, in presence of ferrous salts (FENTON and JONES), T., 71; P., **1899**, 224.
Tautomerism, spectrographic studies in (HARTLEY and DOBBIE), T., 498; P., 1900, 57; (HARTLEY, DOBBIE, and PALIATSEAS), T., 839; P., **1900**, 130.
Temperature. See Thermochemistry.
2:2′-Tetrabenzyl*di*amino-1:1′-dinaphthylmethane (MORGAN), T., 814; P., 1900, 131.
2:2′-Tetraethyl*di*amino-1:1′-dinaphthylmethane (MORGAN), T., 814; P., 1900, 131.
1:2:3:4-Tetraethylbenzene, refraction and magnetic rotation of (PERKIN), T., 267; P., **1899**, 237.

Tetrahydrobenzene. See *cyclo*Hexene.
Tetrahydrofurfuran-2:5-dicarboxylic acid, its synthesis, hydrate and isomeride (LEAN), T., 105; P., **1899**, 198.
d-ac-**Tetrahydro-β-naphthylamine,** racemisation occurring during the formation of benzylidene, benzoyl, and acetyl derivatives of (POPE and HARVEY), P., **1900**, 74.
Tetrahydroxyflavone. See Luteolin.
Tetrahydro-xylic acid (LEES and PERKIN), P., **1900**, 20.
2:2′-Tetramethyl*di*amino-1:1′-dinaphthylmethane and **1:1′-Tetramethyl-*di*aminodinaphthylmethane** (MORGAN), T., 823; P., **1900**, 131.
Tetramethylenedicarboxylic acid. See *cyclo*Butanedicarboxylic acid.
$\alpha\alpha_1\beta\beta$-Tetramethylglutaric acids (*heptanedicarboxylic acids*) (THORPE), T., 932; (THORPE and YOUNG), T., 936; P., **1900**, 114.
Tetramethylhæmatoxylin, oxidation of (PERKIN and YATES), P., **1900**, 107.
Tetramethylhæmatoxylone, melting point of (GILBODY and PERKIN), P., **1899**, 241.
Tetramethylpyrone and its hydrate and salts (COLLIE and STEELE), T., 961; P., **1900**, 146.
periodide (COLLIE and STEELE), T., 1114; P., **1900**, 164.
THERMOCHEMISTRY:—
Temperature, influence of, on the specific rotation of mono- and di-acetyl- and -phenacetyl-tartrates (MCCRAE and PATTERSON), T., 1106.
Critical constants. See under Critical.
Transition temperatures, determination of (DAWSON and WILLIAMS), P., **1899**, 210.
Thermochemical data of alloys of copper and zinc (*f.*) (BAKER), P., **1899**, 195.
of ammonium cyanate (*f.* and *t.*) (WALKER and WOOD), T., 27; P., **1899**, 209.
Heat of solution of ammonium cyanate (WALKER and WOOD), T., 27; P., **1899**, 209.
Thetine derivatives, resolution of (POPE and PEACHEY), T., 1072; P., **1900**, 12.
Thiocarbamide, action of, on ethyl phenylpropiolate (RUHEMANN and STAPLETON), T., 242; P., **1900**, 12.
Tin compounds, asymmetric optically active (POPE and PEACHEY), P., **1900**, 42, 116.
Toluene, refraction and magnetic rotation of (PERKIN), T., 267; P., **1899**, 237.
Toluene, 2:4:5-*tri*chloro- (MORGAN), T., 1204.
Tolyl acetyl nitrogen chlorides and **bromides,** *o-* and *p-* (*acetyl-chloro-* and *-bromo-aminotoluenes*) (CHATTAWAY and ORTON), T., 790; P., **1900**, 102.
2:4-Tolylenediamine, 5-chloro- and its acetyl derivatives (MORGAN), T., 1204; P., **1900**, 170.
β-*m*-Tolyloxycinnamic acid, and its ethyl ester (RUHEMANN and BEDDOW), T., 1119; P., **1900**, 165.
β-Tolyloxycinnamic acids, *o-* and *p-*, and their ethyl esters (RUHEMANN and BEDDOW), T., 984; P., **1900**, 123.
Tolyloxyfumaric acids, *o-*, *m-*, and *p-*, and their ethyl esters (RUHEMANN and BEDDOW), T., 1124; P., **1900**, 165.
***m*-Tolyloxymaleic acid** (RUHEMANN and BEDDOW), T., 1125; P., **1900**, 165.
***m*-Tolyloxystyrene** (RUHEMANN and BEDDOW), T., 1119; P., **1900**, 165.
o- and *p*-**Tolyloxystyrenes** (RUHEMANN and BEDDOW), T., 984; P., **1900**, 123.
Triacetyljapaconitine (DUNSTAN and READ), T., 54; P., **1899**, 207.
1:3:4-Triethylbenzene. See ψ-Cumene.
Triethylsulphine iodide mercuric iodide (SMILES), T., 162; P., **1899**, 240.
1:3:5-Trimethylbenzene. See Mesitylene.
2:3:4-Trimethylbenzoic acid (*prehnitylic acid*) (LAPWORTH and CHAPMAN), T., 311; P., **1900**, 4.
Trimethylbrazilin, oxidation of, with potassium permanganate (GILBODY, PERKIN, and YATES), P., **1900**, 105.
αββ-Trimethylbutyric acid, γ-cyano-, ethyl ester (THORPE and YOUNG), T., 939; P., **1900**, 115.
Trimethyldihydroresorcylic acid, ethyl ester and **Trimethyldihydroresorcinol** and its ethyl ether and bromo-derivatives (CROSSLEY), P., **1900**, 90.
Trimethyldihydroxybenzenes (COLLIE and STEELE), T., 961; P., **1900**, 146.
trans-**Trimethylenedicarboxylic acid,** formation of (BOWTELL and PERKIN), P., **1899**, 242.
αββ-Trimethylglutaric acid (*hexanedicarboxylic acid*) (CROSSLEY), P., **1900**, 91.
Trimethylhydrindamine iodide, preparation of, and indene from (KIPPING and HALL), T., 469; P., **1900**, 54.
Trimethylpyrone (COLLIE and STEELE), T., 961; P., **1900**, 146.
Trimethylsulphine iodide mercuric iodide (SMILES), T., 161; P., **1899**, 240.

Triphenylcarbinol, attempts to prepare ethers of (LANDER), T., 732.

V.

Valeric acids (*α*- and *β-methylbutyric acids*), *γ*-cyano-, ethyl esters (HOWLES, THORPE, and UDALL), T., 947; P., **1900**, 116.
Vanadium, separation of, from sulphuric acid (GOYDER), T., 1096.
Vapour density of dried mercury and of dried mercurous chloride (BAKER), T., 646; P., **1900**, 68.
Vapour pressure of camphor (ALLEN), T., 413; P., **1899**, 135.
of di*iso*propyl and di*iso*butyl (YOUNG and FORTEY), T., 1126; P., **1900**, 165.
of naphthalene (ALLEN), T., 400; P., **1899**, 122.
of *n*-octane (YOUNG), T., 1145; P., **1900**, 166.
Vitexin, constitution of (PERKIN), T., 422; P., **1900**, 45.
Volume, specific, of di*iso*propyl and di*iso*butyl (YOUNG and FORTEY), T., 1126; P., **1900**, 165.
of *n*-octane (YOUNG), T., 1145; P., **1900**, 166.

W.

Water, conductivity of, distilled in air (WALKER and CORMACK), T., 11.
Willow bark, new glucoside from (JOWETT), T., 707; P., **1900**, 89.

X.

Xylenes, *o*-, *m*-, and *p*-, refraction and magnetic rotation of (PERKIN), T., 267; P., **1899**, 237.
Xylidines, isomeric, separation of, from commercial xylidine (HODGKINSON and LIMPACH), T., 65; P., **1899**, 202.

Z.

Zinc alloys with copper, heat of combination of (BAKER), P., **1899**, 195.
Zinc sulphate, combination of, with ammonia in aqueous solution (DAWSON and MCCRAE), T., 1245; P., **1900**, 173.
hydroximidosulphate, production of (DIVERS and HAGA), T., 690; P., **1900**, 71.
potassium sulphate (MALLET), T., 220; P., **1899**, 227.

ERRATA.

VOL. LXXVII. (TRANS., 1900).
